## **From Reader Review Bright Baby First Words for online ebook**

### **Rob says**

This book is more profound than I thought. Neleah is learning a bunch of words from this book and I didn't realize it at first, but they have chosen words that are usually around the house so we can reinforce them. She still thinks everything is a telephone though. Oh well.

---

### **Jamie says**

didnt like it as much as bright baby animals. with the animal book you can make sound effects, so althoug it's good, i didnt have as much fun making sound effects and i think that was part of the reason the 4 month old twins liked it

---

### **Josh Forbes says**

Brilliant piece of modern avant garde prose! There's no story. Just disjointed words and pictures. Poetry at its core. The passage about "fish" chilled me. The one about "chair" gave me gooseflesh. I don't want to spoil the ending, but it has a Shyamalanian twist that can't be shaken.

Well done!

---

### **Sarah Herman says**

I don't like this book at all I can name all the things it says in it that's how short it is, I definitely think this is for 1-2-year-olds.

---

### **Brynya Carlson says**

When Brynya was born the hospital gave us this book and I thought it was so dumb I almost gave it to the thrift store. But I'm glad I didn't! Each page has a picture and one word, and Brynya likes it because she can "read" this entire book all by herself (age 18 months).

### **Chris K Polizzi says**

.50 goodwill

---

### **Destiny Dawn Long says**

The photos are bright, colorful, and very appealing to the eyes of toddlers. However, as another reviewer observed, sometimes they seemed too special and unique to be applied universally by children. There was also the problem where I just didn't see some of the words as essential "firsts" for babies. I have decided that I prefer thematic concept books to the more general first words style books.

She has the English-Spanish *Colors* book from the same series and I like that one better.

---

### **Shannon (Giraffe Days) says**

Another recommendation from my speech pathology friend, who said that kids love this one. As an adult, it's hard to find the appeal, but that doesn't make it a dud. I'm just not the intended audience.

The book is very basic and consists of simple vocabulary paired with a photo of the noun - not illustrations, but photos. Girl, boy, coat, socks, car, dog, teddy and so on. It does have the US spelling of "aeroplane" though, but that's okay. It's a good vocab book and I'll be curious to see what my own kid thinks of it when he's old enough.

---

### **Lorri says**

One of Xander's favorites. We can't go a day in our house without reading this book.

---

### **Alicia says**

I like that this book has real photographs, but the author chose pictures that sometimes can be called different things, like bear or teddy or teddy bear. I wish it had less ambiguous words. Also, sometimes the pictures were a little unique. I wish they had been more universal. With these changes it would be a better vocabulary builder for young children.

---

### **Maddi Holmes says**

I would recommend this book for the early primary grades, kindergarten through first grade. I would categorize the book as informational nonfiction.

Although the title reads "baby," I still think this would be a great book for kindergarten. The students could read the book by looking at the pictures. This would help teach them to read. It would also be a great book for English Language Learners. I wouldn't use it any higher than kindergarten to prevent students from feeling like they are reading a baby book.

---

**Danny says**

The boys like to spell these words.

---

**Samuel says**

This book helps your child read easily.
