Dynamic Deformation, Damage and Fracture in Composite Materials and Structures

Vadim V. Silberschmidt (Editor)

Dynamic Deformation, Damage and Fracture in Composite Materials and Structures Vadim V.

Silberschmidt (Editor)

Composite materials, with their higher exposure to dynamic loads, have increasingly been used in aerospace, naval, automotive, sports and other sectors over the last few decades. *Dynamic Deformation, Damage and Fracture in Composite Materials and Structures* reviews various aspects of dynamic deformation, damage and fracture, mostly in composite laminates and sandwich structures, in a broad range of application fields including aerospace, automotive, defense and sports engineering.

As the mechanical behavior and performance of composites varies under different dynamic loading regimes and velocities, the book is divided into sections that examine the different loading regimes and velocities. Part one examines low-velocity loading and part two looks at high-velocity loading. Part three then assesses shock and blast (i.e. contactless) events and the final part focuses on impact (contact) events. As sports applications of composites are linked to a specific subset of dynamic loading regimes, these applications are reviewed in the final part.

Examines dynamic deformation and fracture of composite materials

Covers experimental, analytical and numerical aspects

Addresses important application areas such as aerospace, automotive, wind energy and defence, with a special section on sport applications

Dynamic Deformation, Damage and Fracture in Composite Materials and Structures Details

Date : Published February 5th 2016 by Woodhead Publishing

ISBN : 9780081008706

Author : Vadim V. Silberschmidt (Editor)

Format : Hardcover 616 pages

Genre :
