My First Human Body Book Patricia Wynne , Donald M. Silver

Here's the most entertaining way for children to learn how the human body works: 28 fun and instructive, ready-to-color illustrations that explore the muscular, skeletal, nervous, digestive, respiratory, and immune systems. Kids will discover how their voice box works, how many bones they have, how thousands of "tasters" on their tongues help them distinguish flavors, how the DNA in their cells is different from everyone else's, and so much more. Filled with astonishing details, this head-to-toe survey of the body is fascinating to read and fun to color!

Gina Starling says

Grades 1-3 This is actually a coloring book that I would use to make copies to teach the children basic anatomy at their level.

Mia Obiwo says

This is almost like a definition book of the different organs and parts of the human body. This is a great reference book for student learning about this topic. This book is for 2nd-5th graders.
