Have too give this 4.5 star. Okay Yes there was Hot Hot sex but there few in between with the drama with Heather ex-boyfriend really not giving much why? And Ryan so call one night date who happens be super star like him. I wish there was more too the storyline then having Heather and Ryan having sex every page or having Heather breaking up with him then taking him back so fast that she kind of forgets why she broke up with him in the first place.

Good beginning. Ryan is an interesting character and Heather is likable. I think the lust at first sight is pretty common but sexual interludes after almost no conversation and not knowing each other's names, is not. Sexy though, and I think a common fantasy by both men and women alike.

OK - The Passion Series that I read have all the books from Masquerade in one book. ***The Passion Series includes 6 steamy love stories: Passion Unleashed, Passion Tempted, Passion Shattered, Passion Revealed, Passion Embraced, and Passion Ignited. (This sensual romance series was originally published as Masquerade The Complete Series.)

OMG - I just love love love Emily Jane Trent's books. I have just recently starting reading books that she has written, and I just can NOT get enough of them!!!

I liked that The Passion Series was 6 (six) little books all put into one. I also liked the fact that they make a complete type story when all combined. Heather (one of the main characters) is an up and coming modern type artist who decides to take a chance with falling in love with Ryan (a Hollywood Actor who is the other main character). These two seem to end up having a perfect type romance and the author does an awesome job of throwing in the normal type road-bumps that any romance might have -- jealousy with ex's, separation, career type problems. I don't write spoilers -- but I will say that once you start reading this series, you will find it hard to put the book down!!!

Lots of head hopping, even in the same sentence very confusing sometimes.

I got the Bundle of this Series. I made it to about 1/4 of the second book and just can't finish it. It is rushed, it has no back story for either of the H/h, it hasn't given me a reason to continue. I love a good romance but it need substance. I need to care about the characters. I need to feel for them. This was just so bounce off the wall rushed, I couldn't get to where I cared.
