The world is at peace. The Earth flourishes. The Old One dreams. Kutu and humans exist in harmony. It is a beautiful time, yet I sense great trouble. Aeons away, on the far side of infinity, where the shadow is darkest and laughter rare, a black-winged Nigh-kutu paced a darkened room in agitation. His brother was dying. He knew he must embrace the rage and cut free all else that he felt. It was the warrior code: Better to have a thousand that could not loose than a million that might not win. There was no place for weakness. This was going to be the battle for life itself. The black-winged ones have vengeance in their hearts and a plan that cannot fail. Who will fall? Tumultus, by KS Turner, is the second book in the Chronicles of Fate and Choice; a truly original concept.
