Darcy Steele is hiding out from her abusive husband who has threatened to take away her young son. The fact that he attempted to force her to abort the son by throwing her down a set of stairs when she was pregnant in no way means that he won't try to take back what he considers his property. She tries to give back to the community by helping other women escape, in this she's occasionally helped by Jack Turner, a bounty hunter. She knows that she's attracted to him but her secrets are getting between them. Her appearance at Rainys funeral has brought her to the attention of her husband. Interesting and well written I enjoyed the romp.

Anya says

It feels contrived in places with a few too many tropes crammed in but it's not a bad story if you're expecting a Charlie's Angels film. I'll continue with the series to see what the next author makes of it but so far I'm a little let down.
