This book was just never going to be my cup of tea. I can completely understand that some people would enjoy this novel, but I could not stand it, and that's okay!

This book has a running motif that clever girls are ugly and don't care about their appearance. The "brainboxes" are ignored and cast aside and are all described as very masculine and forgettable. Whereas the "fashionistas" are all portrayed as airheads. This is obviously my huge problem with the book, as I feel like it promotes the idea that it's more attractive to be stupid and that you can't have both beauty, and brains.

So happy I finally finished it though! It's books like this that make me appreciate books that I mesh with and enjoy.

By Dyan Sheldon. Grade A.

YA is not my genre. Though I myself am a teenager, I don't agree with their thinking and their conclusions. I end up hating the main characters, critiquing their behaviour and attitude and comparing them to the people I know. I find most of the protagonists narrow minded, self-serving and plain irritating.

I was expecting to find all this in Away for the Weekend. So to my great shock it was nothing like the novels I have described above. The book is mainly focused on Elizabeth Beeby and Gabriela Menz and how they turn out to be better people. She had my attention firmly focused from the first page to the last.

A brainbox, a fashionista, and two angels intent on some divine interference – it's going to be an interesting weekend!

The only thing Gabriela and Beth have in common is that they are in LA for the weekend. Gabriela is there for frivolity, fashion and fun; Beth for lectures, learning and literature. But what neither girl knows is that

they are not alone. Two angels are in LA with them. And the angels have other ideas... This is a fast and funny body-swap comedy from a best-selling author.

Remedios and Otto are two angels who always end up ruining their mission. Otto is the one who keeps on thinking but is too afraid to act. Remedios acts and does not think at all. She ends up creating chaos (and sometimes assisting revolutions) and Otto does not help at all (last time he became so upset with the suffering that he hid himself on some tropical island). So finally they both are sent to a small town, on a fairly simple mission. To look after the people living there. Who knew that they would end up finding trouble there too?

Gabriela Menz is the fashion fiesta and Beth Beeby the brain box. They both get the chance to spend a weekend in LA for being selected as finalists in their respective competitions. Gabriela thinks about nothing but fashion, the rest is unimportant. She is pretty, sweet and very very popular. Gabriela Menz may be considered a knock-out among her peers. No one can ever say no to her, no matter how stupid or dumb she acts.

She wants a challenge. On the other hand, Beth worries about everything: she worries about her medicines, worries about her marks and cries if she gets A- instead of A and if there is nothing to worry about, she worries about that too. She has zero self confidence.

Remedios fixes her interest in both these girls and decides to fix them up for better. She follows both the girls to LA and Otto comes after her. She has a plan. A plan which can go wrong and ruin both girls's lives. A plan which can as well turn out to be effective. A plan about which she hasn't yet told Otto. And when she executes the plan, Gabriela and Beth find themselves in each other's body and the nightmare starts.

It provided a nice change to me and many hours of entertainment with it. I loved the way Ms. Sheldon has handled this topic, mixing fantasy with real life problems in a beautiful way. And provides a message at the same time, there is always someone who is looking out for you.

The best thing that I found about the book was that Gabriela Menz was not a bitch. Most authors, in order to portray them as teenagers, end up making the protagonist a bitch. Though she has a brain but cares about nothing but fashion, she's not a bitch. I loved anticipating what will happen next and how they both will cope in each other's life and make themselves a better person. The author's writing style was fun to read.

She did not dwell on the unimportant but handled the issues with a carefully wielded pen: it was laugh out loud funny at one place, and terribly poignant on the other. Her descriptions were hilarious.

You should definitely read this for some careful insight into the human psyche.
