I have absolutely no idea where I found this book, when I was cleaning out my bookcase the other week. I had found it stashed behind my Harry Potter and my Twilight novels, so I thought I would read it and give it a go.

Cupid Cakes is the second book of the Lulu Baker series (although you don't really need to read the first book) already been adapted into a CBBC series, although I am not sure when this happened. Honestly there wasn't much to the book as the main character Lulu's best friend Frenchy (Grease reference?) decides to play Cupid between her divorced mother and Lulu's widowed dad. At first Lulu doesn't like the idea until her dad's ex comes back into the picture.

So, she decides to bake up a batch of 'Cupid Cakes' which to her may seem like a good idea until disaster strikes and everyone ends up falling in love with the wrong person. Sounds a little like Shakespeare's Midsummer Night's Dream, right? Which coincidently happens to be a school play in which Lulu and her best friend Frenchy are involved in throughout the novel.

To be honest, this 'modern day fairytale was not my cup of tea but I can definitely see why the novel series is so popular amongst the younger readers around eight-thirteen. It has all the elements of a fairytale with the heroine, prince and the evil witch and henchmen which would make for an enjoyable read for any young reader.
