Five Monkeys Kieran Galvin

Nadia Spencer is America's favorite bi-racial cosmetic surgeon. She's the UN Special Ambassador for Female Genital Mutilation, a mother to two wise-ass kids, and she's married to the Republican candidate for Mayor of New York. She's just launched her new book. He's four weeks away from election day.

The only problem is Nadia wasn't always a woman. And right now Nadia wants to be a man, again.

Brookie says

I couldn't stop reading. The main characters emotional journey was riveting; the plot never lagged. From the moment I devoured the first sentence I knew this book wouldn't fail to both entertain and enlighten.

Stacy says

I won this book in a goodreads giveaway. I really liked this book. It kept me coming back for more every spare second I had. Thank you Kieren for a great read!

Jennifer says

Original. A plot that winds its way through the absurdities of celebrity culture and political expediency. Be prepared to cringe a little as you recognise some of the essential truths that get teased out to unexpected and often insightful lengths. Be prepared to cringe a little more when you notice editing oversights such as the misuse of "past" and "passed" on more than one occasion. Oh well, that's a small price to pay for the unusual experience of reading a novel which, if you stick with it, has characters who become more likeable the more 'mistakes' they make.

Ronda Wian says

Interesting

A chance of reading new subject books and I wasn't disappointed .it kept my interest till the end. Sorry I read it too quick
