Interesting Places Matthew Storm

Oliver Jones, a man who once discovered he had the power to change reality itself, used to be called the most dangerous man in the world. Now he's joined The Araneae Group, a team of paranormal investigators under the command of Artemis, a seemingly immortal ten-year-old girl. Things that used to seem fantastical, like vampires and werewolves, are now as commonplace in his life as getting a cup of coffee in the morning. But Oliver's ability to change the world around him is no longer working. Even when his life is in the utmost danger, he finds that he's no more special than any other man.

Things take a turn when a cyborg, the lone survivor of a civil war on another world, confronts Oliver's teammate Sally Rain. Sally, once a high-ranking officer in her army, was responsible for his people's extermination, and he wants revenge. While the cyborg is quickly dealt with, Sally is haunted by the terrible memory of what she did at the war's end. She wants a chance to set things right, and she knows just the person to help her do it.

Because Oliver Jones is still the most dangerous man in the world. He just doesn't know it yet.

Dennis says

What a great series

I don't know if it's my sense of humor, style or what but this series has grabbed me and left me wanting to continue. don't know what else to say other than you have to read it.

Susan Gillespie says

Enjoyable read

Great follow up to the first book in the series. Love all the characters Looking forward to the next book.

Sheyna Galyan says

I kept picturing Artemis as a 10-year-old Hetty (NCIS: LA), which was amusing on my end. Loved Jeffrey as always! I did read this a long time after reading the first book, so the summaries of book one were helpful, but I can see where, if I'd read book one right before, it would have been a little heavy-handed. I got a little confused with the time travel and cyborg wars, but that could have been due to my reading at night, and taking a 5-day break in the middle. Very enjoyable and I look forward to book three!

Ann Luteran says

Non-stop reading marathon and I want MORE!!!

Outstanding. Read book one non-stop and had to leave work early because I NEEDED to finish book two. WOW!!!!!! I am intrigued by the characters and the history. Jeffrey needs a talking girlfriend. If you enjoy a fast paced, slightly quirky story or just need to getaway from it all, this series is for you. Waiting anxiously for the next book.

Rebecca says

Great book!

Wow. I love the writing and this book was so fast paced and it was hard to put down. Can't wait for the next one. Mr. Storms writing is very good, I felt like I was there right along with them. The places he writes about were so descriptive and not one sentence was boring. I will be sure to read more of his books and will be waiting with bated breath for book 3 of Interesting Places.

Penny Grayson says**A highly entertaining read**

I very much c h hope Mr Storm continues this imaginative and enjoyable series. He has c created vivid characters, and left me deeply curious as to what further adventures they might find.

Paps says

I loved this one, I practically readed it completely in a single day. It was fun and good the way how a likeable character can make such a disastrous decision, and even more is how you can't actually fault it for it. It was amazing how mutch we were show about this characters and how they feel and cope with their reality, not to mention the interesting piece of information revealed around. Great book, I will run for the next one in the series now!!!!!!!!!!

Zinzi Graham says

The recurring summaries of the first book ruined this for me slightly. It was still an enjoyable read, but having read first book just before this one I found the constant spelling out of what had previously happened somewhat tiresome. If you are going to read both I'd recommend leaving a gap between the two books for this reason! A fun, quick read that had me laughing throughout, if you liked the first book I don't doubt that you'll enjoy this one too. I wish there were more in the series!

Todd Neal says

Love this series. Oliver is a living "Improbability Drive". Too cool.

Bob says

This is the second book in this series that i've read and i enjoyed both of them. This one i found a little more confusing, but that's only because the plot involved time travel and that never fails to confuse me. The talking cat didn't bother me. The vampire didn't. Nor the werewolf or the ancient little girl, but time travel messes with my head. Anyway, the plot was mostly comprehensible and there was enough action that it kept me reading at a pretty good clip. This series of books may end up being my go-to books when i'm looking for just a pleasurable, reliably good read.

Mary Jo says

Interesting

I love Jeffrey , a little like warehouse 13 and an interesting twist to boot. Fun reading looking forward to more.

Michael says

A bit less interesting than Interesting Times

This time I also bought the next book, but I didn't start to read it immediately or write the review immediately either. This book was much grimmer than the last. I missed this off-beat humor which was so much a part of Interesting Times. I don't find reading about genocide and grief for causing it a relaxing bedtime read. Hopefully # 3 will be more like # 1.

Books-fly-to-me says

This story just gets better and better

The characters return from book one and become more human and more bizarre as the story progresses in that way that truly unique characters do whether you meet them or read about them. These characters live a story that is thought provoking and compelling while retaining that which makes them unique and consistent. This is an intelligent book I feel will enrich and entertain you.

Janet says

good story

Michealla says

Mehh it was good. That's the impression I have of the whole series at this point: it's good, entertaining and a lot of fun, but not really much else. It's worth the read.
