John S Roth says

Great Book!

Adele Abbott's wickedly funny, yet captivating series following the exploits of one Jill Gooder, P.I. Adopted as an infant she spent her first twenty years growing up as an average British woman. Suddenly her entire world is turned upside down when she's contacted by her birth mother who is on her deathbed. Reluctantly agreeing to visit her, she is insulted when her birth mother calls her a witch, then dies immediately after. Insult or not?

Michelle says

♥♥♥♥♥♥♥♥

Jana Gundy says

Still as good as the first

With 18 books in, you'd think there wasn't anything left to tell but it's still as good as the first! I think it works because while the mysteries are good, the rest is left superficial and uncomplicated. Jack is present some but there's never much drama with him. The twins and grandma are crazy but not too involved, so it all centers around Jill's life with people who happen to be in it.

Tia Garrigues says

Oh gosh

Drama. Mall. Skydiving. Faulty appliances. A crazy cat. And Paranormal nut jobs. Ah, the life of Jill is never dull!

Jennifer says

Another quick read.

Chloe says

I rated this a 3 not because it's bad but because it's just more of the same and by book 18 I'm kind of over it. Jack and Jill's relationship just keeps getting more snarky and less believable, Jill is just as gullible, and the mysteries get solved too conveniently.

In this one, she solves the case of broken washing machines and a guy who jumped out of a plane and unexplainably died.

She's still a level 4 witch and people are questioning how she knew about the secret passageway at CASS.

Not much else going on in this one. I think I'm done with the series for awhile.

Katy Flottman says

Great story

Loved the book easy read great characters dry witt, magic and mayhem. As always keeps you interested to the end!

Kevin says

This is the latest novella in this series I've read, and each one I rated 3-4 stars more 4's than 3. I'm not going to keep reviewing them, you can read the 1st 10 to see what I thought or you can download the first one for free on Amazon I really recommend you do that if you like witch stories or funny British humor.

Diana Blick says

Next to last?

I've lately been seeing signs that the next book will be the last one in the series--this was labeled #18 of 19. After reading this one, it seems less likely, though since there are a number of issues still up in the air. There is the new series, also set in the same world, but I have to say that I for one will be missing Jill. She kind of grows on you.

UPDATE: As my commenter observes, Ms. Abbott has since added further books to her list of those to be released, so there are apparently many more to come. And I couldn't be happier about that!

kathleen m novotny says

Excellent

You have to start this series. The never ending fun just keeps coming. Warning you cannot stop ordering the next one!

Tere Fredericks says

Very Clever!

Jill's been outed! That's all I'm saying.

Barry has a new home. Winky is up to something (so what else is new?). Only this time, Socks is involved. To paraphrase Jill (discussing another matter) who breaks the fourth wall to say this, you should have read all the books. I so heartily agree.

I simply cannot fathom a full English. Or beans on toast for that matter.

There are, of course several cases for Jill to solve. Very clever is our Jill.

Daze is also very clever. She takes very good care of the body snatchers. What, you thought that was only a movie?

Jill and Jack seem very comfortable in their relationship. I really, really hope they make it.

Again, a lovely book with creativity flowing throughout. I am absolutely loving it.

Kristen says

While I enjoy this series for the most part, the stories would be better if the author would focus more on the witch side of her life.

1furrball says

Skydiving good or bad for your health!

Jill uses a lot of magic to get her cases solved. From washing machines to skydiving to health gyms. Of course, you can't forget a very special cat, Winky

Ruth Borja says

Enthralled

Gets exciting as it goes.. who is Magna in Jill's life?? Can't wait to finish the book set.. now off to the next chapter..

Amy says

Loved reading this!
