Another 5 star read from Natalie Banks! I loved both The Dark Room and The Water is Wide and can't wait until she publishes another one. I sat down for an hour to read and ended up reading the entire book in one sitting. Both of her books are set in Wilmington, NC but each book is totally different. Normally, I have the entire premise figured out very early on, but not this time. I kept changing my mind and ended up pleasantly surprised. Right at the moment when I had an answer, I had to reevaluate and change my mind!

All of the characters were well developed, and I felt that by the end of the book Sarah was my BFF. This was such a fantastic love story that I did not want it to end. I will truly miss both Sarah and Collin. Family is so powerful! This is an emotional love story that proves love never dies. I highly recommend this book to all of my romantic book loving friends, but be prepared for some ugly crying!

A sweet story about enduring love and twists and turns that you will keep you wanting to turn the page. The characters have faults and strengths that are so relatable, you'll fall in love with them. I loved that the plot was something different from other books on market right now. It's hard to put down!

I first read this book because of the setting - Wilmington NC is a place I love and just naturally has a romantic vibe to it. The story captured me immediately. I felt for the heartbroken heroine, and was intrigued by the mysterious stranger in her life. The love scenes were just sexy enough, and I especially loved the epilogue. If you like romantic mysteries, Nora Roberts, Nicholas Sparks, etc., I recommend this read!

I just finished the last book I'll complete for the year 2017! I am so glad that I ended the year with this book by Natalie Banks! This story had just the right amount of love and mystery and I finished it basically one sitting. (With the exception of the 3 chapters I read last night!) Before I started this book I had ideas of what I thought was going to happen... I was wrong. When I was a quarter through the book, and halfway through

the book, I developed new opinions... and I was wrong again! And, when I finally got to that telling part, I had to read it twice just to make sure I knew what was happening! I can't wait to read her next book!! I really enjoyed this book and think a lot of my friends will too! Sooo... get to reading!

Great read! The writer has the gifted ability to make you feel the very soul of her characters. The pain, the loss, the love. Can't wait to see what else she publishes.

I'm not one to read romance novels normally. But I completed this book in just two sittings. Everytime that I thought I had the plot/storyline all figured out there was a twist that made me doubt my conclusions. I thoroughly enjoyed this book and would recommend it to others. A totally enthralling storyline and enjoyable read.

This book has driven me total nuts. Laughing, crying, sadness...this book is full of all kind of emotions and constant thrill. As the book started with Sarah walking down the street to meet her best friend over lunch and fainted and saw the those unforgettable blue of her dead husband I cannot help but think; oh man, this is one of those crying books and it was but I was so wrong thinking of it as a depressing book because it was absolutely not.

The story wasn't fast nor slow, it was average going. I liked the writing style which something to say because I normally don't at all like the first person narrative style but there was something in this writing; it was full of person's emotions, helping the reader to understand the character, especially understanding Sarah, what she had gone through and all. And I think that's what made Sarah so special all through the book, her depression and craziness and sadness and other thinking that she need help.

The characters were strongly made but none of them caught my individually. I rather love the couple in this story and that's maybe because the love, emotions and bond the author put between the couples. Let it be Sarah and Thomas or Adam and Emily, I loved them and I was totally agreeing with them all the time which is really rare, me agreeing with characters.

The author was very very good in making reader feel exactly the way characters were feeling. I laughed a loud when they did, cried and laughed together and I think it was the first book that made me cry and laugh together on a happy occasion with Emily.

I thought that I knew how the book will end but as I progressed in my reading I got confused and gave up the idea and then it ended as I suppose it would but caught me complete off guard, Oh I just love when the author play these tricks with the readers.

Over all I loved the story and plot, though the character were not any special they all had a certain charm, especially Sarah. I'd definitely recommend this book to thise who love a ride of emotional roller coaster.

### **Hope's Faves Books says**

I thoroughly enjoyed this book. The writing was descriptive and took me right to the place where the

characters reside. I was so lost in the lives of Sarah and Collin, I couldn't think about anything else. A fantastic love story. Right up there with the greats. Can't wait to read her next novel.
