**Olesya says**

A good book for me is the one that makes me think, that inspires me to go further, to learn more, discover something unknown. That's this particular book influenced me. It inspired 2 articles, it made me google lots of information and statistics, it encouraged me to read more about our world, science, psychology, history, it made me reflect on our contemporary way of living... or to say "existing". It made me rethink some of the concepts and values of my own life. I am really thankful to the author for writing this amazing book and to my mom, who loved it and suggested it for reading.

Even though it feels like we live on the planet "Tormans", there is a hope that goes through the whole story, that we will one day exit "Inferno"!

## Phil Filippak says

Although the first part of the novel is lacking action, and may seem boring, the whole book is a masterpiece of social science fiction. Even the word "communism" doesn't bother you as it describes not the Soviet way of living and thinking but almost the posthuman one.

## **Tania Williams says**

one of my top 10 teenagers books :-)
