## Map of Fates Maggie Hall

Two weeks. ??

That's how long it took for Avery West's ordinary life to change forever: In two weeks, she discovered she was heiress to a powerful secret society known as the Circle, learned her mother was taken hostage by the Circle's enemies, and fell for a boy she's not allowed to love, just as she found out another was her unwelcome destiny. ??

Now, Avery crosses oceans in private jets to hunt for clues that will uncover the truth about the Circle, setting her mom and herself free before it's too late. By her side are both the boys: Jack—steady, loyal, and determined to help her even at the expense of his own duty—and Stellan, whose connection to Avery grows stronger by the day despite her best intentions, making her question what she believes at every turn.?

?But at the end of a desperate hunt from the islands of Greece to the red carpet at Cannes comes a discovery that not only changes everything, but could bring the whole world to its knees. And now Avery is forced to face the truth: in the world of the Circle, no one is what they seem.

### Cori Reed says

2.5 Stars

I'm le sad. I was so pleasantly surprised by the first book, but this one was a let down. WAY too focused on the love triangle aspect for my taste.

### Maggie ? (Reader-in-Wonderland) says

Map of Fates was ultimately way better read than the first book, and after that ending I'm curious to see how this series will end.

I still think some things just don't quite make sense, it's still pretty much silly read at times(though not nearly as much as book one), and I'm not really invested in any of the characters, there's also way too much present love-triangle and the heroine'S damn indecisiveness about the two guys, yet..

I felt like this book was such an imporvement in terms of the storyline - more balanced and captivating plot from start to finish - plus great plot-twists, also in terms of the characters: Especially the heroine who, while I still didn't love, grew quite a bit throughout this book and is on her way to be the person I hoped she would be from the beginnig. Yes she's not 100% likeable for me - still sometimes annoying with her inability to decide for one of the love-interests - but I really do have hopes for her in the finale instalment.

Ironically enough, the character who I was annoyed the most with in this one was Jack, not the heroine. I liked him in book one far more than Avery, here though, somewhere along the way I started to dislike his character quite a bit.

And then there's Stellan, who seemed like a character with some potential from the beginning, and here he got even more so intriguing, yet I need something more from him to determine if I truly like his character or not. All I can say is that there are some great scenes with him and he has lots of potential for the finale. Also, while I don't really ship anyone in this book, I definitely do prefer one of them with her. (And I'm sure it's obvious as to whom).

All in all, way better then the first book, everything I had problem with before improved a bit here, except for the annoying love triangle. Which I hope won't be in the last book.

This picture doesn't do the cover the justice it deserves. Its so pretty! I want to inhale it in one sitting down.

### **Trina (Between Chapters) says**

This sequel was so exciting! More world travel, more clues, more (believable) romance, more uncertain allies. Still wish I was connecting more with the characters (I think I'm bitter about how the mom character is used as a huge plot motivator when we literally don't know her at all and couldn't care less) but for the most part this gave me what I felt the first book was lacking!

### **Kassidy says**

An awesome follow up to the first book. The story and characters are developed so much more in this one!

### **Brittney ~ Reverie and Ink says**

Five stars for Stellan. Three for everyone else.

Ugh, Avery is just so childish.

Although I low-key loved the boat scene.

### **Lainey says**

Easiest 5 stars I've given this year.

Also, my heart.

My feelings.

Everything.

Just leave me alone.

I'm going to be filming a book talk when I'm more emotionally stable to film.

Someone...anyone, gimme this book already! I've been attempting to build a time machine to jump into the future to get my hands on *Map of Fates* .

### **This is like one of those books where the love triangle is pretty much not shitty**

Ohhhh Jack and Avery <3....

Ohhhh Stellan and Avery <3....

Ohhhh Jack and Stellan <3....

### **Wait, what?**

### **\*\*\*Review Update\*\*\***

Holy hell, what a ride. *Map of Fates* was just....//wow//

**BUT LET ME JUST SAY THIS FIRST. Am I the only one completely annoyed by Avery?!** Legit question here.

*But asking me to get married wasn't a small favor => Excuuuusee mee, you had one whole book to hear about all this marriage thing, and you still couldn't accept it?*

*I don't want to be forced to marry somebody to fulfill the mandate when I seriously doubt it'll work => Says she wants to do anything to save her mother, cannot even marry a hot guy (Honestly, it's a win-win, dude)*

*I tossed the napkin onto the mutilated fruit. "We've actually gotten really far with the clues, if you hadn't noticed. Either way, I'm not marrying you." => Oh no, you do not take out your anger on food. No fair. You get to stab a rack of ribs, now you just torture poor cherries. What a cruel bastard*

Despite all that, here are reasons why I sooooo fell in love \*heart eyes\* with map of fates

1. Round-the-World Action: we're jumping from one part of the world to another, fending off Scarface and it's a race against time to find an uber ancient and super valuable treasure

2. The OTP moments: look, I don't care which ship you're on but everyone gets a little something here.

**Jack and Avery** fans see little couple cuteness, few jealous retorts and the "like-an-old-married-couple" fights.

**Stellan and Avery** fans will squeal and drool over certain scenes...BELIEVE ME. I DID.

### **Andreea Pop says**

Sequel Syndrome strikes again. Alas, *Map of Fates* was, sadly, a disappointment. My excitement and almost-childish awe of the first book dissipated, because the glamour of *The Conspiracy of Us* somehow failed to etch into its continuation, bringing the dull instead. However, there were two things that somewhat saved me from rating this one poorly: **the killer second half** and, most importantly, **Stellan**.

The first half of the book was bland. Flat. Meh. Sigh-inducing. Eye roll worthy. Frustration trigger. Boredom incarnate. All the jumping from one corner of the world to another while breaking (really easily, I might add) into museums and following clues for solving the greatest mystery of all is in theory a great adventure. **IN THEORY**. In reality though, there was no real blood-pumping action. No real toe-curling romance. No real engaging plot. Hoping for new developments along the way is far from my definition of a plan for saving the world of impending doom. Thus, I was in no way invested into the story and, on top of that, Avery infuriated the hell out of me.

The second half however, was undoubtedly **GOOD**. I suddenly couldn't put the book down. The action spiced up, the mythology finally conjured something interesting and the characters were developing, even if at a snail's pace. Good stuff, good stuff.

Do not get me started on the love triangle. Jack was so very protective and so very careful that he started to resemble a fretting hen. He ended up being soft and weak and not one time did I imagine him as a knight in shining armor. He was okay in the first book but now he totally aggravated me.

Avery, besides being again one-dimensional and naive, was also awfully dramatic, especially in the romance department. I'm not saying she lamented constantly about having two hot guys at her disposal, but that she was perfectly comfortable in that grey zone of "it's complicated" -- rightfully so -- where she could jump from one boy to another whenever she felt like it.

I've said it before and I'll say it again -- Stellan is the Russian version of Jace and I love him. He was honestly the only character I completely liked -- he was sincere, sarcastic and had layers of personalization. The fact that he was hot was pretty much the cherry on the top. I liked his dynamic with Avery and I can only hope they'll end up together because they'd be a hella power couple.

The secondary characters -- Elodie, Luc, Colette, Lydia, Cole -- were a bit underdeveloped and I would've liked to see them bond more with our trio. Despite that, I did enjoy the teen drama of secrets and past relationships even if it undermined the vibes of "seriously dangerous situation".

Plot wise, there were some boring outcomes and a few really awesome twists and turns I did not expect, especially what the blood union unraveled. The villains took down their masks and it was the **OMG** type of reveal. On the other hand, I also felt they were not constructed accordingly, like not complex masterminds of evil, but sad substitutes with a fetish for ruling the world and killing left and right.

In the final scenes, I felt the distinctive need to face palm Avery thanks to a 'nice' decision that eventually bit her ass. Granted, the ending felt a bit rushed and not thoroughly developed in order to create the emotional wreck the author (supposedly) hoped for. Still, it was entertaining and promised lots of action for the last installment and I am pretty pumped for what's to come. **World War III between the most powerful people in the world, you say? Bring it.**

*Map of Fates* could've been a glorious sequel but, although interesting and satisfactory, no way near the grandeur I thought it will encompass. I know I emphasized a lot of bad aspects, but it is still a good book, though, and I'll definitely read the last one because things are about to get down for real.

**ENJOY! <3**

### **Dahlia says**

Okay, there's only so much I can or want to say this early, because Maggie's my CP and I got to read this reallllly early (MAJOR PERK OF LIFE), and I know it'll have changed a lot by the time it's in a finished version, BUT, three things I already love so much I know any version of this would be five stars for me:

1. Avery's character arc. I loved watching Avery grow in *The Conspiracy of Us*, but that's from "ordinary girl" to, well, spoiler alert. But this book is about her fine tuning, and taking control, and strengthening herself physically and mentally, and I didn't realize how hard that was to do - to show that next-level growth in a book 2 - til I found myself marveling over how well it's done here over and over.
2. The settings. Hot damn. Here is a reason that I absolutely love these books: not only does Maggie write setting gorgeously, and knowledgeably, but she does so with so much love and respect for places all over the world that I swear they glow on the pages. There's so much rich detail, and I love that the perspective of each city through Avery's eyes is one of observation and awe rather than the xenophobic bent that comes up a lot in books set outside the US with American main characters.
3. SO HOT. Just...so hot. I can't even say anything else about that, but let's just say Maggie fielded a lot of borderline filthy texts from me, and I apologize for nothing.

### **Cait • A Page with a View says**

This series is surprisingly fun. I hadn't heard a lot about it so I wasn't sure what to expect... it's turning out to be a lot like an international version of National Treasure meets the best YA tropes? The story could easily get ridiculous, but so far it's not! It's just entertaining.

### **Katie says**

This book was so fun! Definitely a great sequel to *The Conspiracy of Us*! There is travel and romance and excitement galore. Maggie's writing has great pacing, and she knows just how much description to add to ground you in each foreign setting without the story feeling bogged down in details.

*Map of Fates* is a slim sequel, but I think it set up for an exciting finale. Can't wait to see where Avery, Stellan, Jack, Elodie, and crew go from here!
