Fiona Young rayner says

Another great book by Allison

Sanfordgrant says

I liked how they did the readings from both perspectives.

Jenna says

Medium is definitely my guilty pleasure and I love Allison DuBois. My first thought after finishing is what a nice woman she is! I will pick up her other books, if nothing else to say that I've read them all.

Teresa Hunt says

Having read all her other books, I definitely did not feel this was one of Allison DuBois' best, but worth reading anyway. I truly believe she has an astonishing gift.

Gill Wedding says

Not as good as three other books.

Jessica says

I have a fascination with the possibility of "talking" to spirits and I have loved watching MEDIUM, the hit TV show which was based on Allison DuBois' real life as a Psychic Medium. I have read Ms DuBois other books "Don't kiss them Goodbye" and "We are their Heaven" and have been intrigued by them. So when I received her latest book from Allen & Unwin, I was excited.

"Talk to Me" covers an array of aspects of this intriguing ability to contact the "other side". Ms DuBois explains how the spirits contact her and the signs for us to be aware of and open to instead of simply dismissing them. It has left me wondering if I am missing any? And who would be trying to contact me and for what reason?!

There are lots of stories of people Allison has "read", both from her point of view and the person's

experience of having their loved one communicating through this method. I found myself thoroughly enthralled by Allison's writing, yet skimmed over some of the personal encounters of being "read". I'm not sure why I couldn't connect with some of these stories, when there were others that had me in tears.

Allison delves into what it is like to have all three of her daughters, who possess this unique characteristic, and discusses how she educates them to ensure only the positive energies come through. With this learning process from a mother's point of view, Allison has conducted workshops for children and young teens who also have this ability. It would be a very scary and isolating situation for children who have no idea what is happening to them and having parents who either don't believe or can't explain the phenomenon. Having a mentor like Allison would be a massive comfort and relief for these young psychics.

At the end of this, the third book that I have read by Ms DuBois, I find myself not scared of the other side, not scared of people leaving this world as I know that they will contact me if they need to. I'm comforted by the knowledge, according to Ms DuBois, that they are in a peaceful place. One where they are at their "living" happiest and healthiest.

Julie says

I have a thing about enjoying books about mediums and what they believe, although they are all strikingly similar I find their stories soothing. Allison is the true inspiration for the main character on the show Medium so she has some interesting tales about celebrity and show business as well, but the ones I loved the most was when she spoke about her family, especially about her three young daughters who all share some of her ability.

Maria says

Lovely writing

Dixie Goode says

I have been fascinated by the Medium show and by Patricia and Allison. This book is simple, straight forward and easy to read. It has a very positive, caring voice and was worth the read. I like her other books too, but Secrets of the Monarch remains my favorite. If you are interested in her family and clients they all get a chance to speak in this book. I only wish there were also words from the actors who played this family for seven years. Maybe the next book.

Stacy Jens says

If you think you need closure from a lost loved one, she helps you find closure is not necessary as their around us. Don't let go and look for the little things. Great way to boost your grief from miserable to seeking

the truth about the life beyond what we know.

Tanya Tregenza says

I found it was very much like John Edwards style of books a little repetitive however I did like the personal family sections to it.

I also found a paragraph that resonated over and over for me. It was a light bulb moment.

It was this - constant self pity turns a soul into a sort of black whole that will drain anyone who comes into contact with it and make it repellent to others. I mean the people who blame everyone else in their life for anything bad that happens to them.

I also liked the parts where she discusses worked with gut instincts and trusting them. Teaching and working with kids was also very interesting. I would however like to hear more about how she as a psychic helps on police cases and those that she has helped to solve.
