Lynn Demsky says

This second to the Bugglepuff's series is just as good as the first one - I thoroughly enjoyed every page, magical adventure and happening as it appeared --- the family is just so very colorful, funny and bright that you can't help but fall in love with them! - I got it from LuLu and was delighted that you could print all the pictures (so you can color them when you want)! A truly purely magical enchantment wonder of a read!

Mona Moon says

Because I got this gifted trough GoodreadsGiveaway (thank you so much!) I had not read the first book in this series.

The illustrations are matching the plot well, colored (as on the cover and back of the book) they really come to life! Coloring in (as another review suggests) seems perfect.

The writting-style is wonderfully flowing, the reader is not told every last insignificant bit, there are lots of gaps to fill with your own imagination. And imagination kind of is the base on which this book is build. It almost drips out between the pages, let me tell you..

Great for kids! (also the letters are a nice size for children reading)

Thank you Goodreads and you, CL Bennet. You guys really playing with my imagination. This book is great for kids!
