The equivalent of a Dan Brown novel in Tamil. A racy, political thriller set in a futuristic world where the government controls everything. Nila's husband goes missing one day and all government records seem to suggest that no such person ever existed. Nila's quest for her husband aided by a scientist and his robotic dog (that can think) forms the crux of the story. Filled with wit, philosophy and surprising twists!

Sujatha - Whatta Brain!! No doubt!! His absence is a big down to Kollywood Industry!! After reading this

novel, I can correlate multiple Sci-Fi hollywood movies that released recently!! I don't know how a person can think especially in late 80s this far!! Creativity at its best!! Completed this book in a day!!

From the beginning to the end, you will never guess what's going to happen in the next chapter. Sujatha have packed every chapter with a well-crafted twist. Certainly, a 5-star rating from me for this novella.
