From Reader Review Harvard Business Review on What Makes a Leader for online ebook

Alberto Lopez says

A great reference book.

Fed says

It is incredible to see how much emotional intelligence plays a role in the performance levels of a good leader

Paul Bard says

Goldman summarizes his emotional intelligence concept in the context of business executives. It's just not IQ. Outdated.

David Rock's books on brain studies are better.

Mudit Jain says

This book is an assortment of various articles related to leadership. The articles have a research touch, and helps in understanding people/leader and their psychology better.

It gets boring in between and cannot hold attention for long. But its a good book for development - to be read like one chapter a day.

Carl Rivera says

Great book. The last chapter with Eric Schmidt and his experiences wasn't necessary, but I thought the rest was great. Makes great points on 4 key characteristics excellent leaders will possess whether it's intentional or unintentional. Good read.

Kalpesh Rathod says

First chapter is good. For an engineer, rest chapters thoda over ho gaya. Left in between.
