Jayaprakash Satyamurthy says

Another time travel adventure! Murderous priests, a captive dancer, prehistoric beasts and lots of action, although it does seem that the Yoko Tsuno adventures are becoming more about the hi-jinks than about detection.

Alex Wilson says

The book of morning of the world is basically only about somebody who went back in time to save somebody who died before the volcano erupted and they basically made history because they had the machine at the end so it was made a sculpture of the machine.

Aurélie Knit & Read says

Le dessin est déjà nettement moins beau, et je commençais à en avoir marre des voyages dans le temps, qui ne sont pas trop mon truc à la base.

Shawn Cooke says

A great entry in the series, and one for which the less believable elements (time travel, dinosaurs) are at least internally consistent.

The time travel aspect of the series is revisited, and the result is a great adventure. Yoko saves the day true to form, with Monya as her guide into the world of the past, much like Khâny serves as guide in outer space. The other characters, such as Pol, Vic, and now Rosée, are along for the ride without contributing much.

Still a great story, and a fun one to revisit.

Sidsel says

Bind 15-22

A good mix of stories, more diverse than the last batch. Both 70's Yoko, time-travel Yoko and Space Yoko. The addition of her adoptive daughter was a little bland, but she's cute, so it's fine. Pols sudden 1500-Brugge romance was a bit weird, and all the people they bring from the past to current times have got to be messing with some time-y-whime-y things? But I liked Yoko and her gumption all the way through, and the stories almost lived up to my childhood fantasies.

Michael says

In the collection of time travel stories of Yoko Tsuno (Intégrale, tome 3), this story is better than L'astrologue de Bruges, but still not as good as the (earlier) La spirale du temps -- probably because it trades its complexity and mystery for a "flatter", action-oriented script.

Cindy says

Un nouveau voyage , en 1350, afin de sauver "une ancienne connaissance de Yoko" ...

Leloup s'est surpassé dans le dessin/design des décors de Bornéo, ses forêts et ses temples.
