Vanished Evangeline Anderson

Harper Wilde is sitting on the beach, minding her own business when a huge, muscular Kindred warrior with black hair and blazing white eyes demands that she accompany him into the future. Harper has no choice-- she is dragged against her will into a dystopian nightmare--the world as it might become if something isn't changed.

And that something that needs changing is Harper herself.

As a ten'sora, she is of special interest to the Hive, an insectile race of beings bent on taking over the Earth. By using her, they can conquer both the Mother Ship and the human race. Unless she herself is altered so the Hive cannot make use of her, the grim future Harper finds herself in will become reality.

Shad is a Shadow Twin--a Kindred male destined always to walk alone with very little chance of forming a bond with a female. Yet, he alone is able to make use of the looper--a time travel device which allows him to move back and forth between the past and the future to try and save Harper. Falling in love with her isn't part of the plan but the big Kindred can't help himself. But he knows he must put his feelings aside and do what is necessary to change the past... unless he wants the future to Vanish forever.

I was surprised about how hard this book was to read. Throughout the series I did not realize how invested I had become in the characters.

Wow, I was not expecting time travel. Really liked it as a plot point, and the author did very well in working it into the Kindred series. Full marks! The main couple are great too, Shadow gets his perfect mate and Harper is pretty cool. Really sad that the Royal cape died though. It ended up being awesome and badass.

A downside is that we do not see an early steamy chapter dedicated to the previous couple, in this case Thorn and Nehsa, but I get that with time travel it would've ruined the flow to jump back to the present for just that.

Was sure a time skip would be involved, but thanks to this introduced mechanic we now get two timelines for future releases, the future one to be called Children of the Kindred alongside the current Brides and Tales. Works so well, and gives us the best of both worlds without actually needing a time skip to close off the present/past. Very cleverly done. Can't wait to get future Kara's story (Slyvan & Sophia's daughter). Finally we have a female Kindred story coming soon. Not sure if Targetted counts; doesn't for me anyway.

We finally get see the end of the Hive too, or most of them at least. One worker bug survives, along with the Hive/Kindred hybrid he's created as a contingency, in fetus form, who will grow to have all of the dead Sovereign's memories. I'm guessing he'll grow at a normal rate and end up being the first antagonist for the Children series. Only concession I have about it is that it sounds almost identical to when Two cloned himself, so a bit of rehashing of the same plot point. Then again this is a long series and is still going strong.

The epilogue was okay, looks to be another BDSM trip back to Yonnie Six. Ugh, really not a fan of those. From the sounds of things some earth woman will find the lost E'lo stone, and switch places with a sadistic

Yonnite Mistress that she's an identical match to (think doppelganger), who's currently got a Volt Kindred Slave. Yes, that's right - another Elemental Kindred has arrived as I predicted in a previous review. Maybe next we'll get Ice type Cryo Kindred soon! The Volt's tragic backstory sounds very similar to the Collective of the Dark Kindred so I'm wondering if there will be any relation. Now that the Hive is gone it leaves a Villain vacuum, potentially a rogue AI i'm thinking. Again, sounds similar to the Collective, but in that case it was really Two that was in charge and directing the machines.

***** footnote.

white flag is for the series NOT this individual installment which for the most part was pretty good.

This book will grab you from the beginning and take you on a intricately woven time travel adventure. Several times in the book I thought MS Anderson painted her characters into a corner only to be surprised in the end.

Vanished Bride of the Kindred 21

Evangeline Anderson

Finally we are getting to hear more about the early Brides and their Kindred Families. Shad and Harper, long lost loves? This book puts a real twist on Time Travel Romance. Shadow, Shadow twin son of Kat, Deep and Lock is destined to be Special soul. Shad always thought he would never be able to bond, being the Shadow twin of Twin Kindred brothers, War and Peace. Harper just wanted a family, but she was not interested in being Brood Mother to Millions! She just wanted to settle down with a one guy.

How they meet, when they meet and why they meet is the essence of this book. Like most other Kindred Bride tales, what you see is not always as it seems. The Hive has found a way to wipe out the Kindred and exert global control over the Universe. But there's one small catch, they need Harper to make the plan successful. Enter Shad. He is the only one who would be able to stop this. If he only can get to Harper before the Hive does. This begins a tale of intrigues, suspense, romance and oh yeah time travel. Being honest, you will get much more if have read the previous tales, as each builds upon the next and so on. But I hope I've got your interest piqued!

I was given and ARC but the Review is all mine and freely given!

>Book review – Vanished

>I am an independent reviewer. This book is the 21st in the Brides of the Kindred series and ends in an HEA. Harper is a human, but apparently one that can successfully breed with the Hive, unbeknownst to her.

Shadow is the shadow twin to Lock, Deep and Kat. In this story, he is an adult male with the ability to time travel the same loop in order to save Harper, defeat the Hive and save his family. Shadow's story is so sad. A shadow twin can never form a mate bond for some reason. He travels the time loop multiple times, each time falling deeper and deeper in love with Harper. The time loop resets each time he or Harper dies, so he has to endure losing Harper over and over again. Harper has no knowledge of these previous efforts.

>The present time period that Shad is trying to change involves the grown children of the original Kindred. The author can now write Kindred stories with the original Kindred and the grown children in the future. This particular story is extremely erotic, even as Shad tries to fight his feelings for Harper, knowing how heartbreaking it is to lose her.

>This book is appropriate for an adult audience. I am giving this story 5 stars. I loved the idea of saving the past and creating a new future. Shad's HEA is so well deserved, as is any upcoming HEA for War and Peace.

Evangeline Anderson- Vanished: Brides of the Kindred 21 (The Brides of the Kindred) (Volume 21j)

Evangeline Anderson's roller coaster through time story begins a new additional direction for the Kindred series that will feature the children from all our favorite Kindred Bride books as adults. Taking place in the future, It's a bit abstract but it works amazingly well.

Shad is a shadow twin, the offspring of Kat, Deep and Lock from "Sought" the third and one of my favorite books of the series. Kat gives birth to twins, War and Peace, but is surprised to also have a third baby, a shadow twin.

Destined to be alone without a twin he doesn't have an easy path in life and may not be able to ever form a permanent bond with a female.

He has been given gifts though and as a child has a special relationship with the goddess. The goddess communicates with Shad giving him insights into the future.

He is also able to work with the Time Warden, who creates a time loop for Shad. He must try to change the future in order to save earth and the Kindred Mother ship from a full takeover by the Hive.

Time looping takes Shad into the future where adult Shad must save Harper Wilde from being kidnapped by the Hive and used to breed the evil Sovereign's army. Harper is a Tensora, a female able to be bred over and over by the Head of the Hive, horrid insectile race.

Harper is smart, brave, likable heroine who realizes very quickly the importance of her mission with Shad and rises to the challenge. What can't be denied is the attraction and impossible heart wrenching love that grows between the two.

The authors highly creative imagination goes into overdrive in this book taking readers on adventures on several new worlds, strange cities with even stranger inhabitants, customs, foods, clothing, sexual encounters, etc. This time jumping, dangerous, heart racing ,suspenseful, emotional story is guaranteed to leave readers breathless. As always it is also filled with the author's special blend of love ,sensuous romance/erotica (and of course some kinky stuff).

Love getting our first glimpse of the grown up children of our favorite Kindred books.

Wow, this was such a heartwarming book. To begin with I wondered how the dynamics of this could work, what with the time travel etc but I shouldn't have doubted Evangeline, it was simply amazing.

Harper and Shads story was so great and to be honest has to be up there with one of my favourites. I was so excited about Shadows book anyway, but this way exceeded anything I could of hoped.

The Kindred books just get better and better and just when you think they can't get any imorove, or amaze again, they do!

I cannot recommend this book enough and highly recommend that the rest of the books in this series are also read, just fab!!

A copy of this book was provided to me with no requirements to review. I voluntarily read this book and my comments here are my honest opinion.

I have to say, Anderson took me by surprised with this installment. It was very dramatic and entertaining and a bit different from what I am used to find in the Brides of The Kindred. I enjoyed it quite a lot, specially the time travel loop which was nail biting at times. I was left wondering if this was the last we saw about the kids of the kindred but I am glad to see that's not the case. Great read, I really enjoy it.

I really enjoyed the surprise turn some events took! I didn't expect Shad's story but I was glad I got to read it! The first chapters were very emotional and sad too! I have high hopes for this series!

Wow is all I can say after reading this story!!! I had been anxiously waiting to read Shad story and let me tell you that it was definitely worth the wait. I absolutely loved Shad and Harper. The struggle they both had to endure even though Harper couldn't remember it. I could only imaging the heartache, frustration, and pain that Shad had to go thought every time when he couldn't complete him mission and be with the person he love. My heart broke for him. The same way I loved Harper I also wanted to shake her, I felt like she was being so inconsiderate and selfish. She didn't stop to think about how all this was affecting Shad at all. Even with that been said this was a enjoyable and entertaining read. I'm totally looking forward to reading more

books in the Kindred series. I received a free copy of this book via Booksprout and am voluntarily leaving a review no minority compensation was received the opinions I have expressed are my own.

Samm Lynn says

I have been waiting for this book since Shadow was born (Sought - his parents' book - is still my favorite in the series) . Every single glimpse we have had of him has shown that he was going to go through hell and he did - time and time again. Shad has suffered an incredible losses and the Goddess has given him a way to change the past and save everyone. Looping through time and resetting every time something goes wrong in his attempt to foil the Hive's plans for Harper and the Earth but time is running out and he just knows that this is his last chance.

This supersonic romp through the cosmos to prevent Shad's past and Harper's future does nothing but bring these two characters closer. With new obstacles and new allies?, it is a great addition to the Kindred series and opens up the new Kindred series set in the future with all the children from the couples in the main series - Daniel (Olivia and Baird's son), Aziz/Ziza (Lauren and Xairn's daughter), War and Peace (Kat, Lock, and Deep's twins and Shad's brothers), and Kara and Kaleb (Sophia and Sylvan's twins).

There is one giant plot hole but it is easily overlooked during the enjoyment of the book. So grab it, devour it, and sit back and wait for the next book in the series.

What a wonderful lead in to the Kindred Children's stories. We've already learned about Shad's gift of talking to the Goddess, and how he's able to know things that seem unlikely, but seeing all that he goes through for his family and Harper makes things even more real for him. Shad, the Shadow twin from Deep Lock and Kat's triplets, has been through hell fighting over and over again trying to save Harper and his species. The Hive took Harper and bred her and eventually defeated the Kindred and took over Earth. Shad is trying to change the past, but is desperate not to grow more attached at the same time. I love how protective he is of Harper, but I feel so bad for both of them knowing what's in store for them both.

I cannot wait to see what happens next with both the Kindred and the Kindred Children. The lead in for the next books are making me anxious already and I cannot wait to see how things work out for them. A little worried about the future though, things look a little hairy for the future!

Sophia Triad says

Main characters: Shad and Harper

Type of Kindred: Shadow

New book with Shad! Yes, the shadow twin's story as a grown up!

Shad is the third son of Kat, Lock and Deep. His twin brothers are War and Peace.

And we actually have a glimpse of the rest of the children as grown ups.
What a nice surprise!

The Shadow Twin is an extra, so he has no twin of his own.
He is the *one cursed to walk alone always*.
Poor Shad. He has to save Humans and Kindreds all by himself.

We have met Shad as a kid. Now we will meet a grown up Shad who arrives from the future in order to save Harper who for the time being relaxes by the beach thinking about her life without knowing that the Hive and Sovereign Ysldred X'izith wants to abduct her and breed her and as a result destroy the Earth and the Kindred Mother Ship. The future is horrible and dystopian with many deaths.

Have you seen the movie "Looper" with Bruce Willis or the movie "Groundhog Day" with Bill Murray? Think of a desperate Shad who goes back to the past again and again trying to alter the future and trying to save Harper. He needs to introduce himself again and again to her, to fall in love again and again and to lose her again and again.

Very interesting story and a very nice introduction to some new stories with the children of our favourite Kindreds.
