Lifespan Development in Context: A Topical Approach Tara L. Kuther

Award-winning author Tara Kuther presents Lifespan Development in Context, a topically oriented edition of her bestselling text that provides a panoramic view of the many influences that shape human development. Kuther's student-friendly narrative guides the reader through immersive video cases and visual summaries to illustrate how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change throughout our lives. Three core themes resonate throughout each chapter and across each developmental domain and topic: the centrality of context, the importance of research, and the applied value of developmental science. Foundational theories and classic studies are weaved together with contemporary research and culturally diverse perspectives for a full, updated introduction to the field that is both comprehensive and concise. Case studies, real-world applications, and video examples ignite critical thinking and class discussion, ensuring students have the tools they need to apply course concepts to their lives and future careers.
