**Planet Hulk: Warzones!** Sam Humphries , Greg Pak , Mark Laming (Illustrator) , Takeshi Miyazawa (Illustrator) , Mike del Mundo (Illustrator)

It's Battleworld's most incredible warzone -- a land of monstrous, roaming Hulks! Few ordinary humans could survive Greenland for long. But Steve Rogers is no mere mortal -- he's an indomitable gladiator, especially when sitting astride his trusty steed, Devil Dinosaur! With the mysterious Doc Green his only ally, can this shield-wielding hero ride into the Mud Kingdom and rescue Bucky before the Red King sentences him to death? They'll face wild Hulks in the jungle, giant Hulks in lakes of fire, bull Hulks and plant Hulks and plenty more besides! It's a Gamma Mamma-Jamma that may break the spirit of even the world's greatest freedom fighter. But how did this Hulk-infested realm come to exist in the first place? Collecting PLANET HULK #1-5.

## Planet Hulk: Warzones! Details

Date : Published January 19th 2016 by Marvel Comics (first published December 15th 2015)

ISBN : 9780785198819

## From Reader Review Planet Hulk: Warzones! for online ebook

### **Jordan Lahn says**

Loved the art. How quickly can we get Captain America riding Devil Dinosaur in the movies?

---

### **Sesana says**

Mostly a 2.5 star book. It just felt like there wasn't enough happening to support all five issues, so I kept getting bored between the actually interesting scenes. But I'm bumping it up to three stars because the ending was truly unexpected and gave the whole a heck of a lot more meaning than it had been building up to. Also, where else can you see Steve Rogers ride his pet dinosaur? That's a serious question, if there are any other comics that give Steve a pet dinosaur, I want to read them very badly.

---

### **Felwah says**

3.5

It was short which is what I needed right now .

---

### **Alex Sarll says**

A gladiator Steve Rogers, who's strongly implied to have been Bucky's lover, riding Devil Dinosaur through a land where even the flora and fauna have been gamma-corrupted - this should be a lot more fun than it is, even if Humphries does eventually deploy his familiar fascination with utterly fucked-up psychology and no-win situations. However, it did cause the chap next to me on the Tube - a recent arrival in Britain, to judge from his accent - to ask where he could find magazines like that, so I was able to advise him how to find comics in libraries, and suggest Comixology as a possible alternative. So it's done at least that much to make the world a better place.

---

### **Riah says**

Beautiful and heartbreaking. I knew the ending going into it and I still cried.

---

### **Sam Quixote says**

In the gamma-infected, Hulk-infested part of Battleworld known as (what else?) Greenland, the Red King is causing trouble for Emperor Doom. A gladiator version of Captain America and his Warbound, Devil Dinosaur (a red T-Rex), are dispatched to meet up with a rogue Hulk, Doc Green, to assassinate the Red

King and free his hostage and Cap's bestie, Bucky Barnes, the Winter Soldier.

I was a little wary of this one because it's written by Sam Humphries and it's a Secret Wars tie-in but actually Planet Hulk wasn't bad. Besides Cap being a gladiator, one of the few connections to the original Planet Hulk is Greg Pak who returns to write a short prequel where it's revealed how so many Hulks came to be. It's not very good and, given how pointless these tie-ins are, wholly unnecessary. There's a section of Battleworld full of Hulks - that's fine, I totally accept that on this bizarre patchwork pseudo-planet, no need to explain it any further!

In fact it feels less like Planet Hulk and more like Planet Kirby. Captain America, Devil Dinosaur and Hulk - these are all Jack Kirby creations. I'm not sure why he thought to throw him into the mix but including Devil Dinosaur was an inspired choice by Humphries - Devil definitely adds to Cap's very one-dimensional character (about the only thing he has to say is "I gotta save Bucky" ad nauseam!).

Everything in Greenland is hulked-out from the animals to the plants so Cap, Devil and the Doc's journey across it to the Mud Kingdom had some eventful moments - a little bit Manifest Destiny even, if you read that Image series. It's a straightforward plot with few surprises - buuh, do ya think Cap will make it to the Red King? - and you know something's up with the Doc's true/de-Hulked identity. It's not exactly a fascinating or deep read but it's also not boring.

Marc Laming's art made the book for me. Seeing our trio of heroes walking across this ruined fantasy landscape (and it does have a Warcraft-y feel to it with the Hulks looking orc-like) was really cool and Laming shows Devil in his element, fighting everything from monster plants to groups of Hulks - good stuff! It's not breath-taking art but it's good quality.

Planet Hulk is perfectly ok for what it is: a disposable, done-in-one story for an overblown event. It may not be among the best but it's certainly not among the worst Secret Wars tie-ins either. Go in with low expectations and be pleasantly surprised!

---

### **Paul E. Morph says**

Yet another pointless Secret Wars tie-in. Stupid story, reasonably decent artwork but... Devil Dinosaur tearing shit up earns this one a three star rating.

What can I say? I loves me some dinosaurs...

---

### **Jacob says**

Public library copy.

I've noted on other Marvel titles I've read how I didn't care for the event. Most of the stories I've read spinning out of Secret Wars and specifically Warzones haven't been great, but this book was better in comparison to the other Marvel titles.

---

### **Brent says**

Ok, this was not my cup of tea, but I respect the craft involved, especially some fine slammin' superhero comics art, crisply pencilled and inked. Artis Mark Laming is a name to watch. Plus, there is Devil Dinosaur all the way through.

---

### **Cheese says**

Very disappointing. :(

---

### **Chad says**

Unlike most of the Warzones tales, this one is good. Even though it's called Planet Hulk, the main character is Captain America. He's fighting in the arena for Doom's amusement along with his new sidekick. Doom sends him to Greenland to take out their ruler the Red Hulk. It's a well-written self-contained story with good retro art from Marc Laming.

---

### **Mike says**

?Super-simple take with a little nuance and a whiff of homoerotic fanfic (not enough of that going around Marvel these days, amirite?).

Never having read the original Planet Hulk event, I don't know what they tried to pluck from there and weave in for maximum nostalgia. I felt no nostalgia pangs. Not even a hunger pang.

Steve Rogers quests to find his "Warbound" Bucky Barnes, with trusty steed Devil Dinosaur betwixt his legs/at his side. Many roaring adventures were had, especially once they're dropped into Hulk territory like the elite team from Predator.

War philosophizing, confrontation and loss results. Sorry Steve, you're not quite the same with an axe and a shield, though I'll concede that at least the dialogue didn't have me scratching out my eyeballs like Gage's Spider-Island tie-in Spider-Island: Warzones.

---

### **Daniel Butcher says**

Captain America rides a dinosaur for the win!

As the back cover says...Hulks and Dinosaurs. What More Do You Want?

There are some scenes from outside Greenland that I wonder if are backstory...so that was a little confusing.

I've never read Planet Hulk and now I want to.

---

### **David says**

It's not a re-visit to Planet Hulk. It's a new concept that's more like Planet of the Apes. But instead of Apes it's Hulks. And Charlton Heston is Steve Rogers who is a super-soldier with Devil Dinosaur as a companion. (Capt. and Devil is an idea worthy of a book but it should not have been this one).

This is nothing like the Planet Hulk books. So I felt a bit conned. And it has a pretty awful ending.
