## Scared of Spiders Eve Langlais

Bring on the bug spray, because to prevail, Josie's going to have to face her greatest fear.

Josie's not a brave person, and she's especially scared of spiders. Imagine her surprise when she finds herself attracted to not one, but two, larger than life men.

Clint and Brandon both want the timid mouse who's come to work for them—and their beasts are chafing to mark her—but when she can't decide between them, there's only one thing to do—share her.

Before they can convince Josie that a threesome would benefit them all, they need to take care of the menace threatening their chosen mate. And when Josie confronts the bogeyman of her nightmares, she discovers an emotion stronger than fear—love.

OMG, HOT!

## Michelle says

Great addition to my kindle library! Loved the mystery in the story and how the spider phobia came into being. And the shifter heros were hot - they can come save me anyday!

## Jessica says

This is the book that convinced me ARE raters can't be trusted. Cardboard cut-outs would have more charisma and mental acuity than the heroes/heroine and the WTFery was off the charts. It was almost, but not quite, at the level of so-bad-it's-good that would have me happily mocking until the end... instead, every time I try to read more I found myself physically cringing. I don't even have any constructive criticism to offer. DNF.

Alpha Clint and Beta Brandon know the instant that Josie walks into their office she is their mate, they didn't expect to both be trying to win her but they will deal with it. What they don't understand is the terrified look on her face and the abrupt turn and walking out the door.

Josie is terrified of spiders, in fact she walks around with bug spray to keep the icky creatures at bay. Although she catches the eye of two handsome men, she can't pull away from the descending spider heading in her path and leaves. When Clint and Brandon assure her that all eight legged creatures will be banished on a nightly basis and she has the job, she is pleasantly surprised. Her feelings are conflicted though when she realizes both are attracted to her and she doesn't want to choose one over the other. When it looks like Josie is in danger from an unknown entity, Clint and Brandon decide it is time to take matters into their own hands, they will share her if she will have them.

Fun read, loved Josie she was a delight. Clint is the more dominate of the two, while Brandon is the charmer. I enjoyed this story quite a bit.

Langlais has become one of my instant-buy and go-to authors for paranormal and erotic romance but I am afraid unless the stories become a bit longer I will not be rating anything over 4 stars. I love the author's

writing, her deft way at creating connections in such a short amount of words, and I truly love every one of the characters I have so far read but I want Langlais to write a big fat novel. I want the happily-ever-after but I want a bit more tension and danger getting there and I'm certain this author could pull it off. If Langlais ever writes a full length novel, I will be first in line to purchase it. Until that day, I will enjoy working my way through her novellas.

*Scared of Spiders* is an excellent piece of escapism. I instantly liked the heroine and I find that to be pretty important as many lead females in these types of books grate on my nerves. This author's female characters are interesting and relatable and not the least bit annoying or shallow. I also liked the menage storyline, which is not normal for me, but Langlais draws her characters so well, it actually worked, twice now since this is the second book of hers I have read. And more than anything else, Langlais has a wonderful humor and sharp wit. I appreciate that her characters speak like real people, cursing included. And I love the type of alpha male characters I have so far read. Obviously, I thoroughly enjoyed this book.

Highly recommended for fans of erotic PNR who want a quick and entertaining read.

Fun story of an alpha and his beta, Clint and Brandon, finding their mate. The only problem is that its one human woman. Will she be willing to share in their passions and accept them both? Well, this is a love story with a HEA after all.

Josie is shy, timid, and deathly afraid of spiders. How can a woman that is afraid of her own shadow accept and tame an alpha and his beta? With Clint and Brandon's help, Josie learns to overcome her fears.

My two complaints with this book are,

- 1) I detest timid, omega types in reality and especially in books. And Josie wins the prize for omega of the year. I love a badass heroine that isn't afraid to live and take chances.
- 2) The love scenes were too short and infrequent for paranormal erotica. I like a love scene with tons of foreplay and sex that lasts for more than two lines.

So this book gets a 3 star but had the potential to be much more. I love Eve Langlais' writing style and will continue to read more of her books.

I have been wanting to try Eve Langlais for a while and when I saw shifters I couldn't resist. I thought overall it was good but the female character came off as an airhead in several places but once she realized her power she got better. The evil character made sense and the two guys were yummy! I will try more by this author.

Scared of Spiders...Most people have a phobia of some kind; Josie has arachnophobia. Spiders of any shape, size, colour, or hairiness cause a reaction of epic proportions. She carries 'Raid' in her purse instead of mace.

She has nightmares about spiders. Josie is scared of spiders.

Brandon and Clint are best friends and partners in business and are looking for an office manager. Josie is looking for a job after she rejected unwanted advances from her boss and quit. Josie walks into their warehouse and both men are instantly focus on her because their wolves recognize Josie as their mate. Josie sees a spider in the warehouse and runs. Both men go after her to talk her into taking the job. But there is something sinister in the city and it is stalking Josie.

Don't know why I bother with this author. It's been years since I read one of hers though and I'd forgotten.

Whew! \*wipes fog from my ipad just to write this review\* This is one hot number. It had some twists to the heat. I loved the relationship between Josie and her boys. And yesh, just no with the spiders. Some things are more than they seem. The good thing, those wolves probably have big feet, which means big shoes for squashing those hairy eight leg beasts. I love the HEA! Grab a shoe, the book, maybe something to wipe the screen(this is one hot number) maybe a fan or sit directly under the air vent. The narration was awesome. Ugh spider shifters. I am glad he was no match for this Alpha and Beta.

I found Scared of Spiders very satisfying and fun to read. This is a cute sexy story about a woman named Josie who is scared to death of spiders. She is so scared she carries a can of Raid with her. Josie soon learns a can of Raid won't keep everything away, especially when she has two wolves hot on her heels bidding for her attention.

This is a ménage relationship with a couple of hot scenes, one with double penetration so, yes there is anal. This trio has never met before so; their relationship comes together pretty fast. The only downside I found some may not like the idea of Josie taking the wolf shifter so easily. You won't find much chase or complain about these men being shape-shifters. I myself didn't mind it. I recommend this one to erotic paranormal readers that likes a trio of fun.

Another winner by Eve . This has you going and wondering from the first scene.

There are some wild men that are wolves but they are the ones that kill for no reason. They are after another pack and the girl that caught her scent.

Meanwhile the Josie is afraid of spiders ? She has nightmares of how one is going to kill her in the web .

On a job interview she sees 2 delicious men. Clint and Brandon They are total opposite which makes them yummy . While she can't decide they decide to share her . Since Josie is their mate . To top it off it's an Alpha and a Beta mate

Love how Eve wove a delicious strong female with a sense of humour. Eves females are not the weak and silly sort . The stories are filled with strong characters that know how to have fun

The narrator was fantastic loved her voice.  
I highly recommend this one

Josie is not having a fun time. No job, scared of spiders and having nightmares, and then there are the 2 hunky studs who couldn't possibly want her.

Of course they do want her, and Clint & Brandon need to fight her nightmares before they can have her.

Another fun shifter menage story with a scary protagonist.

Ms. Langlais wrote quite a story here! The way she wove Josie's history into the 'current' story was fascinating. Clint and Brandon were very cool and hot, heroes. The villain, whose name I can't remember, was actually very scary so I had to be careful not to read it too close to bedtime.

I enjoyed this one very much, even the scary parts and I was pleased it had a happy ending.

Yikes! I can relate, I've always hated spiders, but Josie has a very strong fear that pretty much freaked me out :)

We start off with Josie looking for a new job - her last boss tried to harass her, and she just didn't have to nerve to face him again. So she sent him an email telling him she was finished at the job... unfortunately her landlord wouldn't care why she didn't have any money to pay the rent, so she wasn't going to be picky.

She found a job in a warehouse across town and made the appointment.

When she walked into the warehouse, as if on cue, every male in the place stopped whatever they were doing and looked over at her... freaky -

But Josie's eyes caught on one particular man - Wow! He was a big guy, and being Josie, big was scary , her eyes traveled over to another male, big too - but there was something about these two who didn't scare her like everything else did - but then something caught her eye in the corner.. up above their heads - a spider - like it turned towards her and started stalking her.. job or not, hunky guys or not, spider triumphs all, she's

out of there...

Jogging up to catch her, Clint and Brandon couldn't let her know. Their inner wolf was calling to get this woman back into their eye site. Clint is the Alpha of the pack, and Brandon is their beta, it's not normal for a human to attract more than one were, but Clint could see it in Brandon's eyes that he wasn't going to step aside. And when Brandon shook Josie's hand, he could see the spark fly off both of them.. They were going to have to share ...

Josie is a meek little mouse - she seems to be afraid of everything - not just spiders, but to speak up for herself, to voice her opinion, or to let herself fall for a gorgeous guy, knowing she couldn't keep his attention and he'd wonder away leaving her with a broken heart...

Brandon and Clint - lol they're awesome with Josie - I can feel her fears as she thinks things through, but Clint and Brandon want nothing but to protect her. To keep her safe and happy.

Josie learns that the two men are weres, and she excepts that... But when she comes upstairs from doing laundry one Sunday afternoon and finds a note threatening her and her "pups" she calls Clint in a panic. That's when Josie packs a bag and heads over to the Ranch -

Great story :) Loved the fictional character at the end who was doing all the mind controlling - just the thought of him gives me the willies :)

Great Manage too - these two men are there to make Josie happy, even if she doesn't know what to do with two men :)
