## **From Reader Review The Baby Goes Beep for online ebook**

### **Heidi-Marie says**

Well, not amazing or brilliant. But I don't suspect many of the books I'm looking for to use in Baby Storytime will qualify there. Good thing we only are reading one book per storytime! I will probably like this more after I use it with babies. Until then, it's just a "meh" for me.

---

### **Andrew says**

I loved reading and singing this book at the same time.

---

### **Tracey says**

picture book (baby, toddler)

the baby (pictured on the front cover) makes a lot of rhythmic noise with a nice pattern that the audience can follow along (and repeat over the course of the book).

a great, short and sweet book with colorful pictures that works with large crowds (even when not everyone can see the pages).

---

### **Shanshad Whelan says**

Since I can't figure out how to disconnect the board book and the hardcover, I'll have to note things here. I give five stars to the hardcover which is by far one of my favorite read alouds for any child under two years old.

I give only three stars for the board book which is a trimmed down version of the same said book. It cuts out one repetition of the action word and completely breaks up the reading beat. I found myself adding the missing text back in to balance the read. Really am not a fan of board book versions that scale back a book, especially a book as simple as this one.

---

### **Milton Moon Louie says**

Learning some sounds. B

---

### **Caitlinleah says**

On the short side, lots of great sound effects for short attention spans.

Kim says

This book is one of my favorite storytime books. I've read this book twice now at my baby storytime and it went over really well both times. The adults pick up on the repetition of the sounds and said them along with me. This time reading it I made motions to go along with the sounds.

Beep- touched the tip of my nose like we beep in Wheels On the Bus

Boom- hit my free hand on my thigh

La- gestured with palm face up

## Flip- pointer finger in circles

Yum - rubbed my belly

Splash - spread fingers on my free hand like we do for Twinkle, Twinkle

Smooch - blew kisses

Shh - finger to lips (read softer)

## **John Yelverton says**

This is a children's book which is used to teach kids how to read by making virtually every word on the page be an onomatopoeia.

**Julia says**

**SUCH A GREAT BOOK.** This works for toddler storytime for little ones who like making noises and acting out the motions with their grown-ups, and works great for baby storytime where the grown-ups can soothingly make the noises on each page as a group together. Each page shows a normal part of life as a baby, whether it's eating, banging on things, giving kisses, or snuggling to sleep.

Only downside to this book is that the baby is white, and doesn't need to be. A 2018 version of this book would, hopefully, do better in that way. Other than that it's perfect.

?? says

That baby got a nice hair cut.

**Hyrum says**

This book was a chilling reminder of how everything fun like bath time is really just a ploy to get me to

sleep. I'm going to be much more suspicious of any time my parent's pay attention to me. This book really opened my eyes to the horror of what people are capable of when their baby doesn't want to go to sleep. I know that parent's aren't bad.... they just do bad things like give me baths when they are sleep deprived. Just be aware.

---

### **Jesse says**

Very simple picture book with lots of sounds and large eye-catching illustrations.

---

### **Heather Jo says**

lily summer reading 2018, board book, things that go, babies,

---

### **Kelly says**

Very simple book with lots of sound effects for baby to participate with. Good nap- or bedtime-book.

---

### **Dave says**

Not bad. A bit basic. Babies might like it.

5/10
