The Never List F.E. Greene

Victoria Smith's life seems dreary until someone knocks on a sealed door inside her London bookshop. When Tori discovers it's not a ghost but a journalist from 1854, she accidentally strands him in 2014. Intrigued by the dapper and crusading Charles Stratford, Tori offers to help him locate a pendant that will reopen the door to his century. Even when their treasure hunt across London turns dangerous, Tori finds herself wishing that Charles could stay. But after losing her family a decade before, can Tori risk loving someone again, especially a man from 1854?

Lured into the future by a mysterious pendant, Charles Stratford must track down its counterpart to unlock the door between Londons. When the winsome Victoria Smith volunteers to join his search, Charles becomes smitten with the intrepid bookseller. He also uncovers an ancient struggle between two underground societies and becomes entangled in their secret intrigues. If Charles fails to return both pendants to 1854, he places his own London at risk. But how can he succeed when it means saying farewell to Victoria in 2014?

From modern-day Soho to nineteenth-century Mayfair, *The Never List* takes readers on a whirlwind tour of Londons new and old as its time-crossed heroes search for a way to love each other within two centuries. It is the first in the **Love Across Londons** series which should be read in order.

Romance Heat Scale: Mild/PG. No detailed sex scenes, profanity, or graphic violence.

Many important plot lines were dropped into half sentences, with no further reference until many pages later; things that really matter in how the plot moves along need to be emphasized at least somewhat. Also, many times I couldn't identify with the heroine's reactions. For example, in the middle of a storm in which the main characters Charles and Tori take refuge in a church, Tori acts strangely, and Charles takes note that she's acting weirdly. But that's it; we're not let in on WHY she was acting strangely until much later in the book when we learn a part of her background. It would have been helpful to hear that tidbit about her background at the time she's acting strangely because of past history; otherwise her actions are puzzling and odd. And then there's all the winking. What's with that? I was born and raised in the south, and the only person I knew who winked was a lascivious uncle. Last: How many times did we read about Charles' "Cumbrian" eyes? What are "Cumbrian" eyes, anyway? Blue? Round? English? Whatever they are, his brothers had them, too. I got the book for free, and I won't be purchasing any from this author. In the author's favor, I did finish the book--and when a book is really bad, I won't waste my time.

I enjoy time traveling books and this one has it all - adventure ,romance, crossing the pond to America -set in merry London .
A hopeful romantics dream.

I liked the concept right away. While I felt like the pacing was a bit shaky at the start (and, at times, felt a little wink and self-indulgent) and it took me a while to start liking Victoria, it eventually got going. There are some small gaps and unexplained situations/characters which may or may not be resolved in Book 2, which I have yet to read, but I like this one well enough to read the second. It was a quick enough bit of fun and was conceptually intriguing enough to steal my imagination for a short while.

This is the best book I have ever read! It has romance, adventure, intrigue and time travel, which is not usually my cup of tea. I have a new favorite romantic couple, Charles and Victoria. Mr. Darcy has nothing on Charles. Of course, there is the great Aunt Priddy and all the people of Victoria's "tribe." The novel takes place between 2014 London and 1854 London. I learned a lot about the 1854 London and all it had to offer. Thankfully, there is a book 2 and 3 to keep the story going, which I am going to be reading next. I can't wait! The books need to be read in order. You won't regret picking this one up. Highly, highly recommend!

I absolutely love "The Never List" by F. E. Greene, so much so that I fully intend to follow this series. She pens a well developed and thoroughly intriguing story that shows immense promise as the saga continues. I was especially taken by the totally unique approach that illustrates the never ending battle of good versus evil will thoroughly entertaining the reader. I highly recommend "The Never List" to any reader who enjoys a rollicking great tale, skillfully told and highly entertaining. Thanks again to the goodreads giveaway program for awarding a free copy of this delightful book to me and exposing me to yet another wonderful author and a unique story series.

I love time-travel novels and have read quite a few. This is one of the best written ones in terms of the characters reactions to the changes in era. The contrast between the contemporary and historical eras is realistic as is the difficulties Charles and Victoria have in adjusting to them. The mystery as to how time travel is possible as well as who the various strangers are who keep appearing and reappearing to Charles and Victoria kept me intrigued. However, I found the romantic angle lacking. I just never felt the chemistry between the two leads despite their quick attachment and commitment. I would rate this one 3.5 stars. The time travel aspect and the continuing mystery behind it are well done enough to keep me reading the series.

We are proud to announce that THE NEVER LIST by F.E. Greene is a B.R.A.G.Medallion Honoree. This tells readers that this book is well worth their time and money!

Carol Gardner says

A totally enjoyable read.

Marguerite Gray says

I loved this time travel book. FE takes the reader on a fascinating journey between two Londons with danger or intrigue around every corner. Her colorful characters release the flavor of the different times with delightful dialog, clothing, gestures and thoughts. I'm ready for book two.

Very sweet and entertaining time-travel story. A 1 on the sexiness scale, which was kind of refreshing; I was beginning to think people didn't write romances like that anymore, haha. I thought the contemporary parts of the book worked better than the 1850s sections, but the author did a nice job in general of pointing out some of the more obvious concerns that would come up if you were time travelling. (As River Song would say ... NO SPOILERS.)

Jane Balke Andersen says

A most enjoyable romantic time travel novel switching between 1854 and 2014. I am interested to see what the author will do with the series.

Wow, so happy I picked up this ebook from Amazon. I don't usually read romance, but this book was so much more than romance. It has adventure, romance, and time-travel. Who doesn't love time-travel? Especially when there is a cute guy involved!!! So this American runs a used book store and lives above. Loved the Spurgeon references. Recommend this book!!

Never say never again. Not my usual genre and if I had realised it was a romance I don't think I would have picked it up. I am glad I did. I do like visual language and also time travel and the romance was not over done. I really felt transported to 1850's London and thoroughly enjoyed all the glamour and pomp also the squalor and dirt. I loved all the characters and I suspect this is why I enjoyed the book so much. Lots of nice people with a few scoundrels thrown in. The story its self had a few twists that kept me interested. On the whole a fun light hearted and well paced book. No dull spots for me.
