The legendary island nation of Akora endows its descendants with rare gifts. Now one compassionate young woman must discover her own extraordinary power--and her heart's desire--by facing the greatest challenge of her life....

Fountain of Fire

Daughter of a renowned Akoran warrior and an English-born beauty, Clio is content with her lot as a pretty, warmhearted girl among a family of compelling and exquisitely attractive people. Yet it is precisely her immensely soothing nature that is to bring her unexpected power--and passion. For a distressed young Queen Victoria has requested that Clio become her lady-in-waiting. During a time of political unrest, it is a position of inherent danger. But Clio is determined to be of service....Charged with safeguarding the queen from a suspected assassination plot, William, earl of Holyhood, is delighted to have the company of Clio. Not only is her sweetness a balm to the soul, but she is also, curiously, an Akoran princess. Long fascinated by the tantalizing island, William soon finds his interest superseded by an enchantment with Clio herself. Surprised by their deep mutual attraction, the couple have only to agree on how best to protect the queen--and themselves--from those who would steal their futures. But it is a task more easily said than done, and one that may hold the fate of an empire--and a blossoming love--in the balance.

I found this book a bit boring, nothing exciting would happen so I skipped a lot of pages. Boring

It pains me to say it, but Litton's last Akoran book was a dud. Stop at Persephone and Gareth's book...that was a high note and my favorite of the series.

This one had too much going on and the heroine did some really stupid things. The hero is a spy but can't tell anyone and the heroine throws herself into danger because she "has a right to" even though she has no self-defense ability or experience.

It started off strong but quickly fizzled for me. I only got 50% of the way through it.

I read the first 3 Akora books and the prequel series before I picked up this...by that time I was addicted to Miss Litton's writing...unfortunately this was disappointing. I didn't fall in love with the characters and the setting seemed to have lost its shine. I never finished it but it's still sitting on my desk. I'm not sure but people who enjoy regency romances might like this more than I did. The Akora series never fit that mould for me though.
