## **Nightmare** Bonnie Bryant

Carole Hansen's father has been sent away on a secret Marine Corps assignment. She worries about him constantly. When a fatal equine illness strikes a neighboring stable, The Saddle Club girls have 45 days to wonder, and worry about, whether the disease will reach Pine Hollow, and whether any of their horses could be in danger. Carole secretly decides to hide one horse from the affected stable and care for it herself. Meanwhile, Lisa Atwood is trying not to let her competitive impulses take over. But a classmate has challenged her for the position of valedictorian. Will Lisa's compulsion to always be the best turn the classroom into a nightmare? And Stevie has found a mysterious place in the woods. Is she on the trail of an Underground Railroad route? Or is she chasing after nothing?

### **Dark-Draco says**

I don't remember reading this one when I was younger. The story was ok, but I hate it when animal stories have to be sad. Why? So that spoilt it for me. As an adult, I could see a few inconsistencies between the story and what would happen in real life, but I probably would have liked it as a child.

### **Kingfan30 says**

took this book to India with me as a holiday read. I have never read any from this series and had I found them when I was a kid I would have read them all. As an adult i thought it was a good read and it only took me a day, I liked the fact I could pick it up without reading any of the others but could imagine them being tedious if they were all written with the same amount of information about the characters. It was an informative book with some riding tips so can see why horse mad girls would love them.
