**When the dragon whispers, who will listen?**

The lakeside town of Ashbourne is under siege. Inside, the manic worshippers of the legendary Rogue Dragons—the Dragon Tongue—plan to offer the town's citizens up as sacrifice. And one of these people happens to be an unlucky Gnome named Gelbus Cogspark, whom Maria thinks she needs to complete her quest. With their sacrifice, Odarth, the Bright will take to the sky again, once more wreaking havoc across the land.

**But when the ancient evil awakens, who will put it back to sleep?**

*Armed with her only sword and her music box, Maria Apple and the rest of her crew travel to Ashbourne, prepared for an all-out war. But Ignatius is weak, Frieda is a stranger, and there's more to worry about than just saving the town. Still trapped in the world in between, the villagers of Dominion await their savior.*

*Yes, the battle is over. Now the war begins...*

**I get by with some help from my friends(and magic)**

Maria,her grandfather ignasius,and telepathically wordy bloodhound sherlock go in search of a gnome who could tell them how to prevent a dragon from being brought forth that would destroy a small town.there's only a group calling itself the dragons tongue and orcs plus marias own self doubt standing in the way...

This was another action packed book and I am still asking the same question. Where in the Dark Forest was Dominion located. Nice to see Maria's friends help her kick some cans.

### **Fantastic!!!**

I'm loving the Midwest Witch series!

Michael, the movie you are thinking of is the Pitch Black series, specifically, The Chronicles of Riddick. ?

Kindle Unlimited, had been reading all the Oriceran books {pronounced Or-i-sar-in}, Martha Carr seems to be co-writer in all of them, different characters/series but couldn't get in to all of them. The ones listed at the end that just give the name of the series subsection {all of them are Revelations of Oriceran} means at some point I quit reading those. The ones that have listing for every book out, yes have read all of them and keep following those. The reason, for me personally, is because the best could give the other series were a 3 rating, while Midwest Magic and The Leira Chronicles are 4 1/2 at worst, 5 best. The others just don't resonate or something with me, but as have said before, reviewer opinion, likes/dislikes vary, so listed them at least. Only reason haven't bought the 2 I do like is because waiting for a nice set, preferably with a little savings on per book \$ as been missing the 99 cent intro prices. {they did end up doing book 1-2 then about

week later book 3-4 for 99 again just before soon to be released #5}. This was more a 3 1/2 but since 3 is 'negative' to amazon left it at 4.
