Bullsh*t or Fertilizer Pierre Bennu

Ever get tired of having the same conversation over and over again, just talking or thinking about what needs to be done instead of getting motivated to act? This book is for anyone who needs a heaping dose of momentum and focus, and who better to dish out such advice than Pierre Bennu, an award-winning filmmaker and artist who's had such conversations countless times? This page-turner is the perfect companion for those times you need a little motivation, whether you're on a bus ride or a train trip, or standing in line for four hours to audition for the second feline from the right in CATS. It tells you how to get started and shows you how to make and attain goals—and it contains some of the best advice ever on making contacts and selling yourself or your creation. Teachers, singers, writers, astrologers, actors, painters, and anyone longing to create will benefit from the conversational advice in this little book. The author and title make no bones: You can either use the book to help you grow, or . . . you get the picture.

I really wonder if when Pierre and Jamyla wrote this book they realized what an impact it would have on peoples lives....quite easily one of my favorite books of the last 10 years. It's a 30 minute read...I've bought about 10 copies. Many for others. At least 4 for myself, I think all of which I've ended up giving to complete strangers on the train when they asked what I was reading.

A must have!
