From *New York Times* bestselling author Sandi Lynn comes a love story about defying the odds and second chances.

Do you believe in fate?

Do you believe in soulmates?

Do you believe in second chances?

Quinn

Since the car accident, I felt like my life was a giant puzzle and I was missing the vital piece that would complete me. Little did I know I would find my missing piece in New York City. He was handsome, kind, and I felt something the moment I met him that I never felt before. For the first time in twelve years, I was happy, and I was convinced that nothing could destroy that feeling.

Noah

The day I saw her in the art gallery was the day I felt like life had been breathed into me again. She was beautiful and she didn't know who I was. She felt something. I could see from her eyes and the way she smiled at me that she felt the same connection I felt. She fell in love with me, but I had a secret. A secret that could possibly destroy us. Was it worth taking the risk? What I wouldn't give just to be able to rewind time.

There are not many authors where I will drop everything and read their books, but Sandi Lynn is one of them. Her books are filled with words that you give you all the feels and pull on every emotional string that you have, which makes you fall in love with her characters.

This book was just outstanding, Quinn and Noah's story will leave you believing in the power of finding your one true love. Quinn and Noah meet by chance one day in his family's department store and fall instantly in love and over the years have their whole future planned out together, when a bad car accident involving Quinn and her parents, which her leaves her as an orphan and not being able to remember the last five years of her life.

Quinn spends the next 12 years missing a piece of her heart and she doesn't know why, will she be able to find that missing piece again, or will she spend the rest of her life feeling like something is missing?

Loved this book and was I was beyond excited that I was selected to have an ARC of this amazing book, clear your schedule and spend the next few hours with Quinn and Noah.

Quinn and Noah

I loved this! I loved how Noah was almost obsessively in love with Quinn. He knew she was his soulmate and wouldn't stop til he had her.

These two were teenage sweethearts. They fell in love at first sight but a tragic accident not only tears them apart but takes Quinn's memory of Noah as well. I broke for Noah and the devastation he felt knowing the woman he loves believes him to be a stranger.

“I love you to the moon and back, Quinn.”

Twelve years later they meet and fall in love all over again.

“The moment our hands touched, I felt something tear through my body that I'd never in my life felt before. It was almost as if life had been breathed into me.”

Quinn may not remember Noah but her heart does.

This is a second chance story that was heartbreakingly amazing all at once. I also loved that you get a couple of chapters of them when they are young but not a lot. I have read some books where half the book is of the couple as kids and it becomes boring. This had just the right amount to give us some connection to Noah and Quinn without dulling the memories.

Rewind is a beautiful second chance at love story. This book seriously tugged at my heart strings and captivated me immediately. The writing is passionate, and the storyline is heartbreakingly emotional and unforgettable. Sandi Lynn always does a fantastic job writing books with consistent plots that are direct and to the point. Rewind was no exception and Ms. Lynn gave me all the goodness that I wanted and more.

Noah and Quinn are high school sweethearts who are deeply in love, their future is bright and they've made plans to spend the rest of their lives together. Unfortunately, Quinn is involved in a horrible car accident and not only did she lose her parents, she also suffered a brain injury which caused her to lose the last five years of her memory. Her grandmother asks Noah to leave since Quinn has no memory of him, she feels it would not be beneficial to Quinn and would hinder her healing process. Poor Noah is absolutely devastated and I could feel his heart shattering through the pages.

Twelve years later, fate decides to step in and reunite Noah and Quinn. Quinn is now a successful photographer who has moved back to New York from Minnesota to continue her career. The past twelve years have not always been kind to Quinn as she went through so much physically, mentally and emotionally. She's done her best to move forward and to me, that makes her resilient and amazing. While Noah's professional career as the CEO of his family's company Kingston International is better than ever, his personal life is a train wreck. He drowns his sorrows in whiskey and limits himself to having one night stands which is all he can ever offer a woman. Noah's heart has always belonged to Quinn and he will never be involved in a committed relationship again. And as to be expected, Quinn has no memory of Noah when they see each other again. Even though she's never "met him before", she does experience an overwhelming feeling (in a good way) and it's as if Noah is her home. Noah decides against reminding Quinn of their past and they embark on a "new" relationship.

I was very anxious to see how their story would unfold. I cheered for them as I knew they were destined to be together. Their connection was undeniable and their romance was intense, sweet, passionate and very sexy. Noah and Quinn will linger in my heart and soul for a long time. This is a definite must read!

Another exceptional book by Sandi

This is a love story of a love that went away for 12 years but found its way back to one another.

Quinn was a very bright young lady when her paths crossed with Noah in a department store after she knocked over a vase.

Noah was going off to college and they were going to make their relationship work.

Quinn was going to dinner with her parents and Noah had a meeting with his dad. While at the meeting Noah received a call from the hospital stating Quinn was in a crash. When he got the word he tried ringing Quinn's parents but got no answer but when he got to the hospital he discovered Quinn and her parents were involved in a crash and killed her parents but left Quinn with a severe head injury.

Noah rang Quinn's grandmother and told her what happened. Then the worse news came saying that Quinn's head injury caused her to loose five years of her life which results in her been 12 years old. Quinn's grandmother told Noah to leave her alone and get on with his life.

12 years later and Noah was never the same he was sleeping around and drinking heavy to kill the pain of loosening Quinn.

Until one night at a gallery opening that Noah's family sponsored his path crossed an amazing photographer Quinn.

He was dumbfounded that he had seen her again and found their way back to one another.

But Noah had a secret that could ruin their relationship.

They rekindled the relationship they once had as Quinn was the only one for him.

Until Quinn found out the real truth what happened 12 years ago and what her grandmother had done. Their love for one another never died and everything was coming back to Quinn after she found her diary which she wrote about Noah been the love of her life. And he never did fall out of love with Quinn.

Millennial Book Life Crisis - Samantha says

This story is all the feels and brings out all the emotions! Another great read from Sandi Lynn! Quinn and Noah met by coincidence as teenagers and fell in love with support from both their families. They had their whole future planned and then a terrible accident occurs and it is ripped away from them. It takes twelve years, but they are finally drawn back together by fate and given a second chance. But with that second chance comes secrets from the past that threatens the chance they are given. I loved the drive and determination Noah had when he was given his second chance, and really enjoyed the underlying theme that you never forget your true love no matter the circumstances. This was definitely a shorter read than most of Sandi Lynn's books. I was a little disappointed in how short this was because I felt there were many points in the story that could have been elaborated on to provide better context. I also kept having to re-read some parts because of the time jump that I wasn't aware was going on. It was a little difficult to follow in that aspect, but overall I loved this story! I really fell in love with the story and the characters and devoured the book within hours of receiving it because I couldn't put it down.

I voluntarily read and reviewed an Advance Reader Copy of this book.

I got an ARC of this book and all I can say is... Sandi Lynn has done it again!

I have been a huge fan of Sandi Lynn since reading Forever black and every book I have read since I have fallen in love with but not as much as I have fallen in love with Rewind.

This story is about Noah and Quinn who were highschool sweethearts and were planning to spend the rest of their lives together until tragedy struck.

Quinn was in a horrible car accident which took the life of her parents and gave her memory loss where she could not remember the last five years of her life including her relationship with Noah.

At Quinn's grandmothers request Noah was asked to leave since she could not remember him or the last five years because this way she could move on and heal from what had happened and he could heal since he was leaving to Yale anyway the grandmother thought it was the best idea.

Years later both Noah and Quinn had lived their lives separately and end up crossing paths again when Quinn moves back to New York from Minnesota where she had moved with her grandmother after the accident.

Fate steps in and Noah and Quinn end up talking after Noah goes to an art gallery where low and behold has Quinn's artwork.

They go out to dinner and sparks fly from the very beginning and Quinn has this attachment to Noah and feels like she has known him her entire life (which is true) and she feels safe with him.

Things progress in their relationship like it had when they were teens and they both couldn't be happier until Quinn finds out the truth that Noah knew Quinn this whole time and that he kept it from her.

This story broke my heart and made me happy all at once (yes that is possible).

I was rooting for them and was hoping Quinn would forgive Noah for not telling her that he knew her this whole time and failed to tell her.

I am really happy with how it ended and happy that things had worked out for Noah and Quinn.

This by far is my favorite Sandi Lynn book so far and am very honored to one of the chosen few to get an ARC.

2 I wish I could get my 2 hours back stars.

Spoilers.....

They were in love when she was 16 and were together for a year. Her parents and her were in a car accident, her parents died and she lost her memory of the past 5 years resulting forgetting the hero. Her grandmother told hero to leave her alone because when she lost her memory she had the mentality of a 12 year old girl. So hero leave her in the hospital room. 12 years has passed, hero becomes a drunk and a ho ho ho! There's a scene in the beginning, the morning after where he wakes up in a hotel room with a woman. Calling the OW his "last night fuck"

Heroine dated and was in a relationship but not as much as hero.

Hero being the emergency contact for the heroine when she's only 17 years old and it's stupid and inaccurate.

When you're a minor, the parents are the emergency contacts and if the parents are not alive then the next of kin is, which would have been the grandmother. Hospital calling hero and giving him info about her accident it would have never happened **IRL** but what do I know? Maybe I'm wrong.

Hero started dating her with the pretense that he didn't know her, she falls in love with him and doesn't talk her that he's her high school sweetheart. When she finds out the truth shes hurt that hero didn't tell her when he saw her again. She asked her grandmother and she tells her the truth. That she's the one who forced him to leave her.

If you're looking for grovel you're not going to find it here.

Do authors ever get tired of writing the same thing over and over again?

"I changed into a person I never want to be again. I drank too much and slept around just to try to forget you. I was miserable and out of control. I was in a dark place, Quinn. Then I saw you again and all that darkness lifted."

Thank you KU

Who doesn't like a second chance love story, Rewind was a story that had it all. It had love, chemistry, and so much emotion. Sandi Lynn has a way to make you feel what her characters are feeling, she has a way to describe and make you understand her story so well.

Rewind was about two people who had plans, plans for a future together. When a tragedy happens, it leaves a person with a heartbreak and another one with no memory of the last 5 years of her life. Noah and Quinn where amazing, the chemistry, the way they loved each other was just so perfect. This story was about how destiny has a way of making true love find each other, it was about giving love another chance, and it was about life. This story was so sweet, it had me wanting more, and it had me wanting a real life Noah.

Get ready; Sandi Lynn will be taking you on a ride you will love so much. This is a love story you will not want to miss, it will make you swoon, smile, laugh, cry, and so much more.

Layla Sian Rathbone says

Quinn and Noah are inseparable. Their young love so intense they think nothing will ever break it. But a devastating accident leaves their relationship in tatters and a heartbroken Noah is forced to leave Quinn behind.

12 years later a chance encounter brings them back together, but Noah is hiding something about his past that could break Quinn and leave them both heartbroken all over again.

Do soulmates really exist? We will have to see...

This story had every emotion and feeling you expect from a second chance love story. When you read how Noah lived his life for 12 years it guts you to the core.

But his determination to make Quinn fall in love with him again has you rooting for him from the off!

Poor Quinn has gone through so much pain in her life, you are desperately hoping she finds her missing piece of the puzzle and experiences the love she hopes to find.

I'm a huge fan of Sandi's and have pretty much read all of her books, she is a pro at writing these beautiful love stories we dream about and bringing those dreams to life through her words.

4 to-the-moon-and-back Stars!

ARC given in exchange for an honest review.

I've always been a massive fan of Sandi Lynn's work so when I received this ARC, I immediately dived right in, without even reading the blurb. Since I haven't read anything bad from this author since she first published *Forever Black* way back 2013, I believe she would not disappoint with this one. And I'm not wrong! I love this one!

It's a fast-paced story. A bit long to be considered a novella, but not quite long to be considered as a novel.

The first few pages sucked me right in. I was thinking, "Ohh. I guess this will be a feel-good novel between two teenagers." Boy, I was wrong. I've never been more wrong in my life. My emotions went from happy to sad within the first few pages.

The heroine, Quinn, is very relatable with her shyness, yet strong personality. Noah, on the other hand, is our brooding-yet-disgustingly-handsome hero. I love both the characters and they remind me of Ellery and Connor from the *Forever* series so much!

"I'll be holding on to you to the whole time, I won't let you fall, Quinn. I didn't back then, and I won't now"

Ok. Swooooon~

This story is about finding your soulmate, or how it always finds you, even when all the circumstances seem gloomy. The writing is fast paced yet there is depth into it. The conflict is mostly from dealing with their pasts and how to handle the present because of the said past, so it was a bit angsty yet not too heavy.

"The memories of now are what's important.
... The only thing that matters is how we found each other again."

dreamy sigh

I instantly finished this story and took little-to-no-bathroom-breaks just to see how it's gonna end! Sandi Lynn, did it again! Great book! I highly recommend it if you're looking for a sweet story about fate, second chances and soulmates.

Sandi Lynn did it once again, she took our breath away with this love story. The book is a second chance love story. You have Quinn who is in a terrible car accident with her parents. Her parents died, and her grandmother takes her with her to Minnesota and raises her there. She lost five years of her life, where she couldn't remember anything since she was twelve. Noah is going to Yale, and after he's graduating Noah starts working in his father's company. Noah had to let Quinn go at 18, it was the hardest choice of his life, he went dark after losing the love of his life. 12 Years later Quinn Returns to New York, and walks into Noah's life again. If you want to know how their story ends, you should definitely read this book!! I highly recommend this book to everyone who wants a bit of romance!!

Michele A. says

Quinn and Noah had their whole life planned out until a tragic accident changed their plans dramatically. Noah was left with memories and the inability to move on. Quinn had no memories, just what her grandmother told her. Fast forward 12 years and fate seems to put them together again. Noah does not want to do anything that will cause Quinn to leave his life again. Quinn has no idea who he is, just that she is drawn to him. Thus begins their story. It was a quick, easy read and you definitely felt for the characters. I thought Noah should have stood up to Quinn's grandmother more and not just let her call the shots the way she did. I did enjoy the story and found it to be quite satisfying at the end.
