GIRL: A Story for Every Les Being Christiana Harrell

Christiana's first short story collection introduces you to the life of women who love women. She caters to every label and "no label" across the LGBTQ spectrum: studs, femmes, pillow princesses, no labels, butches, FTM's, bisexuals etc. Meet them all between one cover as your eyes explore fictional stories that will make you laugh and cry and maybe even a little bit angry from heated arguments, fist fights, struggles with religion, heartbreak, closet cases, deception, and passionate sex scenes. Nothing is left to the imagination. There is something for every lesbian from every walk of life.

This book has everything in each of the short stories-love, murder, and re-awakening of one's desire for another. This is my first time reading this author so I would be interested in reading her other books.

I stumbled upon this authors work after she left me a 1 star review. I downloaded her work expecting to see none of what I was criticized about. I am not a petty person so I read the book really trying not to be biased and get a honest feel for her style of writing. I have two different opinions of the novel. No, its not a horribly bad novel but I don't feel its oh my god a must read novel either. Maybe to the women who tire of men and just jump on the bandwagon then yes I would recommend highly. At the beginning, when first reading the novel I immediately started to notice how poorly it was edited. She mixed up character names, misspelled words, improperly used words, grammar and punctuation was off. These issues were fluent in the beginning within the first couple of short stories but it was corrected as you moved on to other short stories. The issues came back but not as heavily as before. The book became predictable at one point where I could guess what was going to happen in the next short story, or how a short story would end. Some slang I did not understand like juvie? I had to guess what that meant. There's more I didn't like but there is no need to elaborate and keep going on. You can decide for yourself if you like it or not its free after all. But as an author I got the point she was trying to bring across with the book. I like how she provided a short story for all the labels in our community no matter what you are labeled as. I like the awareness she is bringing with this novel. Would I recommend? I would to battered women or women who are in bad situations that could turn worse. Would I read something from this author again? Probably not. I was just curious to see if what I was criticized over would be found in her book. Honestly, I expected more. I thought I was going to pick up and learn some things but I was disappointed. I felt myself correcting her book as I went along. Maybe if I read a compelling sample or a friend recommended it maybe then I would check it out. But at this point no. I do wish the author success.

This was a great book. I hated when it came to an end. I look forward to reading more from this author.

In honor of Proposition 8 going before the Supreme Court, I decided to dedicate the month of April to reading LGBT books. This one was the first that I stumbled upon. I read other reviews on the book, as I usually do, before diving into this one. Some complain about the violence in the book. Initially, I had the same reaction. However, if you read it closely, the author is teaching a vital lesson here. Domestic violence within the LGBT community is real and often overlooked. Those in such relationships should not feel that since they are same-sex that it is an equal playing field and that it wasn't that serious. That's what I took from that.

Also, I loved the fact that the title could not have been better chosen. This book is actually a collection of stories. Each story is that of a different woman. Every single lesbian relationship/encounter/perspective/desires that you can think of is in this book. I'm an avid believer that we are weak as a people because of all our self-division. This book nails this as well. A few characters question the point of labels (stud, femme, tranny, etc.); I loved that it went that deep.

Furthermore, I love how this book reads. It reads like a diary. Each story sounds so real. All of the lesbian-oriented books that I've ever read (excluding Anais Nin), are allll erotic. I know that is not all that being a lesbian consists of and I'm grateful that a contemporary author has finally captured the reality of such romances.

Again, I enjoyed it and recommend it to all--even if simply for a deeper understanding into this lifestyle.

The very first novella that I was introduced to by author Christiana Harrell opened me to a whole new meaning of the LGBT community! Since fifteen I have tried to find my way in the "real" LGBT world and this collection of stories writes out every real life story for me! Nothing like what people speculate or what is altered on the t.v screen! There are favorites of course, but one thing for sure is that there isn't one dull story at all!! It doesn't just pull in the LGBT community either, it turns pages for straight readers too! The most closed minded people will definitely be surprised at what they find as they walk through the pages of this book! I would recommend it to anyone! Pick it up NOW!

The title holds true, everyone can relate to a story in here but they aren't stories that will stick with you unfortunately.
