# From Reader Review Hole Punch Art for online ebook

## **Taleisha says**

I won this book in a goodreads giveaway. I found Hole Punch Art by Connie M. Campbell really interesting and as an artist myself, i can commend her on her patience because those paper dots wouldn't have wanted to stay there at times. I like how it was a portfolio almost, and it portrayed her many capabilities with hole punch dots. I kind of wish there was a little more writing on each of the artworks- Not 100 words on each but maybe a few sentences. I thoroughly enjoyed it, and it is a book built on hard work and patience. :)

## **Jonathan East says**

Beautiful artwork done on a very interesting medium. This has inspired me to try and do some art with this hole punches. I never thought about doing something like this. Thank you Ms. Campbell. This was a giveaway, but that does not influence my honest review of this art collection.

## **Sinead says**

Thank you to Goodreads Giveaways for this book to give an impartial review.

I did not know what to expect from this book but it intrigued me enough to enter the giveaway. When I received the book it blew me away how creative it is and what wonderful pictures can be created from a simply holepunch and coloured paper. I have to admit that I have not found the time to attempt one of the pieces yet but it has inspired me to definitely use in the lead up to Christmas - got an idea that it has inspired in me.

The only reason that I gave it four and not five is that there was unfortunately a slightly blurred effect on some of the pictures which made it a bit grainy and the colours less vibrant.

## **Stephanie says**

I got this book from goodreads first reads. This book was full of beautiful art! It reminded me of a new take on pointillism. My one critique was that I wanted the pictures to be higher resolution so I could fully enjoy the nature of the art. I really want to try it out now.

## **Jen says**

I won the book in a Goodreads giveaway. A beautiful little book - or artists portfolio which contains some fabulous pictures made from the dots that are left when one has used a hole punch. The artist is obviously very talented and I could easily see these kinds of pictures on upmarket birthday cards. There was no story to

go with it unfortunately and rather than entitling a piece as 'Friends - Friends are Everywhere' or 'Ghost Shadow - Never Alone', I would have loved a couple of sentences on why the topic was chosen. It is still gorgeous to look at though, especially 'Winter Birch'.
