Texas Takedown Heather Woodhaven

LETHAL SABOTAGE

Presenting her research findings at an oceanology conference should be marine biologist Isabelle Barrows's big break—until she spots two men chasing her. With shadowy assailants on her tail, impressing potential investors becomes the least of her concerns. Especially when the men chase her straight into the arms of her high school crush. Unbeknownst to Isabelle, Matt McGuire still regrets the way they parted. Determined not to repeat past mistakes, Matt vows to keep her safe and make things right. But what good is a second chance when Isabelle's attackers will stop at nothing to destroy everything she holds dear—her life, her promising career and any possibility of a happily-ever-after?

Cathy Daniel says

Loved the setting & the characters. So good! Non stop action and interesting plot. I did deduct a star because I easily guessed the bad guy (I do read a lot of these books though)

Rosemary K says

Isabelle Barrow's big break might end her life. When she attends a conference to present her research, she becomes a target. Matt McGuire, her high school crush, saves her. Their meeting brings back memories of their unhappy parting. Can he keep her safe so that they can get a second chance at love? I enjoyed this fast paced, suspenseful story. The characters are well-written and likeable. The dialogue is sweet with a touch humor. The action is non-stop and kept me on the edge of my seat. The twist at the end surprised me. I didn't see it coming. I enjoyed Texas Takedown. Heather Woodhaven has written an exciting and suspenseful story mixed with a sweet romance. I'm looking forward to her next release.

Lynn Brooks says

3 1/2 STARS!

Fast-paced action kicks off quickly and leads us into the mystery of who the bad guys are!

Marine biologist Isabelle Barrow is excited about presenting her latest and greatest discovery at the oceanology conference in Texas, but when two men start following her when she's out alone, she doesn't know what's going on! Strange things continue to happen, and eventually she has to admit that someone is determined in getting their hands on her research before she ever makes it to that conference!

Matthew McGuire happens to be in the right spot at the right time to rescue her from her first assailants. He can't believe it when he recognizes her! His best childhood friend ... and high school crush ... Izzy! He has often regretted the fallout they had and losing touch. Will this be the break he always wanted to apologize and explain how he felt about her ... or will the danger at their heels keep them too occupied?

Doris Pearson says

Interesting, exciting.. a must read for everyone.

Melinda M says

Texas Takedown by Heather Woodhaven is a love inspired suspense. It keeps you guessing and the

adventure going throughout. It is the story of marine biologist Isabelle Barrow whos is going to a convention to present her research and to try and get investors. She is attacked and chased and is rescued Matt McGuire, manager of a higher-class hotel who is someone from her high school and life back then. The adventure and mystery is stated . Who attacked Isabella and what do they want keeps your attention. Matt seems to be there when ever Isabella needs him and that starts the romance. It is well written . The characters are well developed. This is the first book that I have read by Heather Woodhaven but it will not be the last.

I received a copy thru a Goodreads Giveaway.

Pam says

Texas Takedown is by Heather Woodhaven. It is a love inspired suspense and has no explicit sex scenes nor language. This makes it very good reading.

Marine biologist Isabelle Barrow is in San Antonio to present her new idea to a convention in hopes of getting funding for her idea. The site she works for is low on funds so she is staying at a cheap hotel which means she has to walk through some questionable areas. As she is walking towards her hotel, she is attacked and chased by men. She manages to get away by hopping aboard a garbage boat in the canal. The boat is being driven by Matt McGuire, manager of a higher-class hotel. He is intrigued by the beautiful scientist and his protective genes and gentlemanly manners kick in and he sets out to protect her. Can he protect her from the men who want her research?

The suspense grows as the book continues. It is an excellent book.

Melissa Henderson says

Who do you trust when danger lurks at every corner? Just when I thought the characters were safe, the action started again. A powerful, fast paced story that kept me guessing as to what would happen next. The author tells a great story of mystery, danger and discovering who can truly be trusted. I enjoyed this one very much. I received a copy of this story from the author and this is my personal honest opinion.
