### **Jett Cat says**

I really enjoyed this freebie (Amazon)! Well written characters. Mr. Paine does a great job of having each of the three characters react to unfolding events in individual and unique ways! I would elaborate, but I don't want to spoil the story. The preview does a fine job of explaining!

I recommend this to anyone who like Post-Apoc, Zombie, End of the world, and the average type person surviving in really screwed up situation type stories.

I look forward to seeing if our survivors can make it, how they will hold themselves together, and of course finding out what is going on!

#### **very suspenseful**

A cliff hanger unfortunately, but well worth the read. The last thing you expect to encounter on a camping trip is a horde of zombies. What do you do? You run like the wind and pray you're faster than them.

### **Trihaly says**

It definitely piqued my interest. This story drops you right smack in the middle of the action, and it feels more like a quick glimpse in a world overrun by Zombies than a full story in itself. I am assuming the rest of the volumes give more depth and information about the universe. I would have liked more.

### **Allan Ashinoff says**

This book has all the element of a good story. It is essentially basically zombie 101 with nothing new to add, so far. The story grips you immediately with action but the dialogue between the character could use work.

### **Jo says**

Be aware that this is the start of a series, so forgive the shortness of this story. I liked it.

VERY short read but well written in a way only a guy could understand but women will love because they know as I do this is the real way guys react in bad situations. When you take a few guys, yes these are guys not the all lovey doveys fakey guys but real more like guys guys and you throw them into the end of the world what will they do? yeah they will be guys, lots of cussing, hurting and joking but truly get down to business when needed.

This drew me in fast. It was short though. I want to read volume 2.

This virus, from infection to change, only takes a few hours. The three uninfected characters are in the mountains when a friend gets bit. Each handles the situation differently. It is then a race down the mountain and, hopefully, safety.

### **Wow**

Four boys went camping and one of them got bit by a zombie. They were on a mountain now there are zombies, how are they going to get to town?

## **Angela Verdenius says**

Really enjoyed this first episode. Gritty, the characters were likeable, the zombies realistic, and the setting easy to visualise. I'm off to find the next episode!

## **Lucas Darathy says**

Not all that well written. Very inconsistent. Roger is the most squeamish, then Roger was never squeamish.

Also, I'm not a fan of TOUGH GUY GRRR. So boring when the main character is oh so awesome that he's the only one with a gun and a brain. The only one who has some control over his emotions. And this guy runs for hours into the woods without wearing any shoes.

Yeah.

Right.

Not impressed, but it was a short story. Gonna read the next and see where it goes.

**Netanella says**

Starts out fast and furious with backseat mayhem reminiscent of Pulp Fiction and ends with a road trip to destiny...or the next town over, called Maybridge. Four city slickers go camping/hunting for a week in the woods and discover that the world around them has become zombified. This is the story of their escape from the woods. Nicely done.

I love zombie stories in general and they are a nice break from the romances I usually read, so I've been picking them up quite a bit lately. This one was very short - too short - but very good. It was well written, good plot and I loved the location it started in.

The grammar was good also (a big issue for me). Just a few errors and nothing major. On a 1 - 10 scale (1 being the least amount of errors, 10 being, "wtf are they talking about?") I give it a 2.

I look forward to the next book and definitely recommend this one for zombie apocalypse story lovers.
