### **Alexa says**

This comic does a great job of alternating between wistful romanticism and anarchist sensibilities, with just enough bitterness to surprise you now and again. Wry without being detached, honest without being saccharine - what can I say, I'm a fan.

### **Melissa says**

Same as the last: I found many of them dark and morbid and depressing. Matt calls them satirical and sarcastic.

### **Kevin Hogan says**

A Softer World really starts to come into its own in this volume (the second). Funny/poignant/creepy/sad. Hard to explain in terms of anything else.

### **Mellie says**

Books like this are always going to get a high rating, because you've already read all of the content online, but you want to own and hold it. You can't just walk into (many) shops and pick this up, you have to really want it. Boy, it's worth getting though. I love it.

### **Rowena says**

the only problem i have with this is that the cover prominently features verdana

I either love or am totally confused by each and every comic in this series. (In that confused-puppy-head-tilt sort of way).
