Miranda Reads says

I desperately need a sequel to this prequel

Every one of them was just fabulous - seriously! But definitely wait until you finish *Winter* before starting this one - there aren't any major spoilers but you won't appreciate these books without finishing the series. **Nearly every story is based on a key event** mentioned in one of our 8 main character's backgrounds.

The keeper - This is the earliest prequel of the series - we follow Scarlet's Grandmother as she travels to Lunar as a young army piolet and meets a strange doctor. This doctor avoided glammers and quickly charmed Scarlet's grandmother - nine months later, Scarlet's father was born. Years later, the same doctor comes to earth, carrying the broken body of toddler-Cinder - begging for her to hide the little girl.

Glitches - Continuing from the last prequel, we get to see Cinder's story from the moment her hardware is installed to her adopted father contracts the plague. While I still think her stepmother and Pearl are ridiculously one-dimensionally over-the-top with their cyborg hatred, I have a better understanding of where they're coming from. Plus, Iko makes an appearance - I adore her!

The Queen's Army - We *finally* get a story from Wolf's perspective! We learn about how he "joined" the army and a bit of the background of the mental manipulating and emotional struggles he went through. Until this story, I totally forgot Wolf even had a brother - though now I do understand why they had such animosity in the second novel.

Carswell's guide to being lucky - A cute story about a devious and scheming Thorne. In the third book, Cress cites a myriad of reasons why she loves Thorne. One of her reasons was the basis of this story. I definitely prefer cool and suave adult-Thorne but it was certainly fun to see what his teenage years were like!

After sunshine passes by - Here we get a bit of history about shell treatment and why Cress became so isolated. While I adore Cress, I much prefer her older persona when compared with her younger-self.

The princess and the guard - A really sweet look into Winter and Jacin's shared childhood. We hear about why Winter never uses her Lunar gift but I never truly understood this until now. It's a wonder that not all of these Lunars are insane.

The little android - This is a retelling of the Little Mermaid (and unsurprisingly, I was unhappy with the ending). Much like Iko, other androids sometimes experience personality 'glitches' that often mark them for disassembly. One little android escapes in time - and suddenly the whole world is open to her.

The mechanic - The cute-meet from Prince Kai's perspective. Spoiler: it was a-freaking-dorable. Especially because we already know all the panic that was running through Cinder's mind. For once he seemed princely and not deer-in-the-headlights when people talk politics.

Something old, something new - One lucky pair from the gang get marrrrried! It was sugary sweet and I delighted in it. I do wish there was more of a plot - but these characters have suffered enough and deserve one pleasant adventure.

Audiobook Comments

Well-read, though sometimes the audio would take on a different tone in the middle of the paragraph/sentence - almost like it was re-recorded and inserted at a later date. Anyone else notice this or was it just my digital copy?

This book made me tremendously happy. Especially the last novella - *perfection*.

CAN WE JUST NOT SAY GOODBYE TO THESE CHARACTERS EVER EVER EVER?? *sobs*

Darth J says

Both have great covers, but maybe not *every* new YA book needs to have a crown on it?

I found *Stars Above* lacking, to be honest. The one story I was looking forward to (*The Little Android*) was so lame. I mean, it was nothing like *The Little Mermaid* at all, and there was no Ursula character to keep it interesting.

The rest of the stories don't really flesh things out or add much backstory that couldn't have been inferred while reading the other books. While it's great to have them all in one hardcover bindup, it doesn't really serve the rest of the books or add closure to the series. There's an excerpt from *Heartless* if you are into *Alice in Wonderland*, but since I'm not, I just skipped over that. Overall, great cover but otherwise lacking in material.

My reviews for *The Lunar Chronicles*:

- *Cinder*
 - *Scarlet*
 - *Cress*
 - *Fairest*
 - *Winter*

I liked this quite a bit! There were a few stories that I felt were just filler & I didn't really care for, but it was fun seeing some familiar faces throughout it. IKO4EVER.

[Kudos to Meyer for not picking Kai]

Errin says

Long overdue but finally finished with the help of the audiobook! My favorites were Carswell's Guide To Being Lucky, After Sunshine Passes By, The Mechanic, and of course, Something Old, Something New!

BEFORE READING

"Stars Above was originally going to include two original stories, and four that had been published elsewhere — but Meyer went above (get it?) and beyond, writing five brand-new stories, including a prequel and epilogue to Winter."

WE ARE SO BLESSED

Katerina says

And they lived happily ever after.

Except the girl-who-read-too-much, aka Katerina, since **she cried her eyes out**, sniffled, hiccupped and then cried some more.

"The first time, he had wondered why she liked books so much, and if it had anything to do with why he liked spaceships. Because they could take you somewhere far, far away."

But mind that they were **happy tears** (mostly). The tears you shed when your babies that went through pain and difficulties find **love, happiness, joy and friendship**.

"That mechanic was going to change everything."

Thank the stars above that Marissa Meyer decided to write these novellas and gave us more precious moments with the characters we came to cherish, before the closure and the aforementioned tears happened. With Stars Above my heart, the heart that was bruised and beaten and bet rapidly and sighed with contentment while reading The Lunar Chronicles, was so **full of love that my chest nearly exploded!** I experienced **pain** with The Little Andoid and The Queen's Army, because the first one was really **touching** and the second narrated how Wolf tried to not become the monster everyone expected him to, and I wanted so badly to hug him and tell him about the red-haired girl that would become his alpha and his home. I **laughed** with 13-years-old Thorne that charmed everyone with his good looks and flirtatious ways and was dedicated to his goals. I devoured every single story about the past of Rampion's crew that made me understand better my heroes and share their sorrows and misfortunes and admire the strong people they became! But let's be honest, the last story, the fairytale wedding, was what left me giggling while wiping away my tears!

“You are the most beautiful sight I have ever laid eyes on.”

A full circle that came to an end. There is no need for hot make-out sessions and sexual innuendos to create a romance that will make your chest burst. Just the connection between two souls, the acceptance and the efforts to overcome every obstacle. And Marissa Meyer, with her **stardust** and **beautiful soul**, created not one, not two but four great love stories that restored my faith in magic and happily ever afters.

Emily May says

2 1/2 stars. I was disappointed with this collection. It works as a way of giving us fangirls and fanboys something to read while waiting for Heartless, but the stories don't really add anything.

Aside from one story - *The Little Android* - it's almost a stretch to call these "short stories". They are all little snippets, filling in the blanks behind the main story of The Lunar Chronicles and never really taking us to new places. Of course, this book is meant for the fans and it reunites us with our favourite characters, but the stories aren't new or surprising.

The Keeper tells the tale of Michelle Benoit and how she receives and looks after Cinder. It also shows Scarlet growing up with her grandmother. Do we learn anything new? Is there an interesting spin to this story (which we already know about anyway)? Do the characters change in our eyes? Nope.

Glitches is Cinder's story as she arrives at her stepmother's house and tries to find her place. *The Queen's Army* is about how Wolf becomes a soldier. **We know this already.** We don't learn anything new or gain new perspective. I never felt like I was discovering anything I hadn't already read about in the main series.

Even the last story - *Something Old, Something New* - which tags an epilogue onto the main story arc of the series, really just tells the tale of what is implied by Winter's ending. A better title might have been *The Happy Ending, Pt 2*.

It's good that I like these characters enough to care about their basic interactions and back stories, otherwise my rating would probably be lower. Also, *The Little Android* deserves some credit for being an imaginative retelling of *The Little Mermaid* and easily the most interesting story here.

MY BLOG: [Melissa Martin's Reading List](#)

♥ OH STARS ABOVE! I LOVE YOU DEAR BOOK! ♥

This book is soooooooo good! I loved weaving back through the Lunar World. Some of the stories we have heard before, but they are still great. **I'm not going to go into each little tale, I do want to add things from a few of them.** All of the Lunar Chronicle fans should love this book.

THE KEEPER

In this story we find out when Cinder was brought to be watched over in her suspended animation tank and it

also intertwined with Scarlet's story.

Scarlet is only seven-years-old when she comes to live with her grandmother Michelle. As these are short stories, it tells of her growing up at different ages.

--->EXCERPT<---

Scarlet loved her grandmother for her quirks, but even she found it a little off-putting to receive a weapon-an actual, deadly weapon-for her eleventh birthday. Sure, she'd used the shotgun before to chase away wild wolves or shoot clay pigeons when she was bored. But a handgun? This wasn't for hunting. This was for...protection.

Like I said, I enjoyed them all but I'm just naming a few so don't look for these to be in any order.

THE QUEEN'S ARMY

This one goes into detail about when Z (Ze've Kesley) was taken into the queen's army to become one of her wolf men.

--->EXCERPT<---

They said the anesthesia would give him such a deep, empty sleep that there would be no dreams, but they were wrong. He dreamed of needles burrowing into this skin. He dreamed of pliers gripping his teeth. He dreamed of hot ashes and smoke in his eyes. He dreamed of a white tundra, a cold he had never known and a hunger barely satisfied by dripping meat in his jaws.

AFTER SUNSHINE PASSES BY

This one tells about sweet little Cress. When she was little she so wanted to impress the queen and become recognized for more than a shell. But, we all know that didn't happen, this tells of her journey to her little station as a young girl. It's sad :-(

--->EXCERPT<---

Her gaze reattached to Earth. It reminded her of a lullaby one of the older girls had taught her years ago, one that Cress still loved to sing to the children at lights-out.

*Sweet Crescent Moon, up in the sky,
Won't you sing your song to Earth as she passes by?
Your sweetest silver melody, a rhythm and a rhyme,
A lullaby of pleasant dreams as you make your climb.
Send the forests off to bed, the mountains tuck in tight,
Rock the ocean gently, and the deserts kiss good night.
Sweet Crescent Moon, up in the sky,*

You sing your song so sweetly after sunshine passes by.

THE PRINCESS AND THE GUARD

This story is about Winter and her sweet guard Jacin Clay. It's so sweet them playing as children. It also tells in great detail of how the evil queen Levana marred Winter's face. I hate her! and I hate her some more!

--->EXCERPT<---

"Help me, Sir Clay! Save me!" Winter cowered behind the fort pillows. Though their fortress was strong, she knew it would not keep out the villains forever.

Luckily, at the most opportune of moments, Sir Jacin Clay leaped to her defense, brandishing the legendary Earthlight Saber-in reality, a wooden training sword he'd gotten from his father for his seventh birthday.

I loved all of the beautiful stories in the book. I devoured each little tidbit from this beautiful series I love so much. If you haven't read it yet... READ IT :-)

I look forward to Marissa Meyer's new book, Heartless!

Update: I accidentally deleted my original review, so I had to upload it again.

This review contains ***spoilers***.

I had to take a few hours off from my life after I finished this book so I could recover enough to review it. When I read **Winter** back in November I had prepared myself to say goodbye to the wonderful characters in this book. The closer I got to that dreadful last page the longer I tried to make it last- I realized that I was not ready to say goodbye and was immensely grateful when I found out that I wouldn't have to separate from my favorite series for another few months because *Stars Above* was coming out.

But now that it's here, it's even harder to say goodbye. The characters in this book all have a special place in my heart and I'm (still) so, so grateful that nobody died.

Ratings for each of the stories:

The Keeper: **4.5/5 stars**

"Cinders. Embers. Ashes. Michelle hoped that whatever strength had allowed this child to survive the fire all those years ago was a strength that still burned inside her. That it would go on burning, hotter and hotter, until she was as bright as the rising sun."

Stars, I loved loved loved reading more about Michelle Benoit. When we first heard about her in The Lunar Chronicles I instantly wanted to know more (about her mission to Luna, her relationship with Logan, her relationship with Scarlet...).

And little baby Scarlet was adorable I kept imagining her with one of her front teeth missing and it's just too cute. Scarlet is one of my favorite characters from this series. She is brave, sweet, strong and I will always want to know more about her.

"The train entered a new station and she squeezed her backpack against her side and tried to look grouchy as new passengers boarded. She exuded her best "leave me alone" vibes."

Scarlet on that train ride was 100% me.

Glitches: 4/5 stars

"I have a glitch, too. Sometimes I forget that I'm not human. I don't think that happens to most androids."

I read this short story right after I finished reading **Winter**, so this was a reread for me— and it's still as good as I remembered it to be.

Glitches explains how Cinder came to live with Adri and the girls and how she didn't remember anything of her previous life. It was heartbreaking, and it definitely worked to increase my love of Peony, Iko, and Cinder. I missed these characters so much.

"Who's Prince Kai?"

Peony spun toward her so fast, she tripped on the skirts of Adri's kimono and fell, screaming, onto her bed.

"Who's Prince Kai?" she yelled, struggling to sit back up. "Only my future husband! Honestly, don't girls in Europe know about him?"

The Queen's Army: 4/5 stars

"He would be brave—so his brother would not see his fear. He would be strong for him."

This story was also a reread for me and I forgot just how much I loved Wolf.

It was interesting having a little bit of background on him because I always want to know more about my favorite characters. *The Queen's Army* was definitely on the darker side- the whole concept of Levana's army is so terrifying. And watching the army take Wolf from his family made me tear up.

Carswell's Guide to Being Lucky: 4/5 stars

Oh, Captain Thorne, how I missed you.

This is a super fun and quick read that I giggled at in a few places (only Carswell can make me giggle).

This story was actually mentioned in **Cress**— when Captain Thorne and Cress talk about how young Carswell defended a girl and then got suspended for it.

It was really interesting seeing the actions of a younger Thorne, and it honestly made my heart grow even fonder of him.

After Sunshine Passes By: 4/5 stars

"Sweet Crescent Moon, up in the sky,

You sing your song so sweetly after sunshine passes by."

This is the story of how Sybil placed Crescent Moon in that horrible satellite. Cress is such a sweet character and I had tears in my eyes when she thought that Sybil was going to take her somewhere nice to reward her for all of her hard work.

*"She'd been so focused on going to Earth. So excited about trees and oceans and cities ...
And now she didn't have any of that. She didn't even have the dormitory or the other shells anymore."*

The Princess and the Guard: 4.5/5 stars

I'm in love with Jacin's love for Winter.

"There was no safe place. Not in Artemisia. Not on all of Luna.

Except—Jacin.

When her screams succumbed to hysterical sobbing, Jacin finally allowed his hold to turn from the grip of a jailer to the embrace of her best friend.

"This is why," he whispered, and it occurred to Winter that, at some point, he'd started crying too. "This is why I can't leave you, Winter. This is why I'll never leave."

In this story we discover in depth why Winter decided to not use her Lunar gift.

A part of this was mentioned in the book **Winter**, when the servant tried to kill herself and Winter "saved" her by using her Lunar gift. But then the princess finds out why the servant had wanted to jump of the edge- and she vows to never use her gift again.

This is where I got really emotional.

"Winter's entire world was spinning and it occurred to her with sudden clarity that this was wrong. Her training sessions. The thaumaturges. The entire Lunar gift. The power that the strong, like she and the queen and Aimery, held over the weak. Like this servant girl. Like Jacin.

Like Winter's father."

The Mechanic: 4/5 stars

"The mechanic?"

The girl—Cinder—nodded. "How can I help you?"

Kai stared at the top of her head.

Linh Cinder.

The renown. The reputation. The approval rating.

New Beijing's best mechanic was ... a teenager?"

It's been almost a year since I first read **Cinder**, so I'd forgotten how cute Kai and Cinder were when they first met.

And Iko had me laughing so hard I had tears in my eyes, I love her!

"Iko, please pay your respects to our customer ... His Imperial Highness.

The android's sensor flashed as she scanned Kai's face. "Prince Kai," she said, her voice taking on the unexpected tinge of a sigh. "You are even more handsome in person."

Kai laughed—a sudden, uncontrollable laugh that burst out of him before he could reel it back."

Something Old, Something New: 5/5 stars

"I wanted a quiet, intimate wedding, not a circus."

Thorne leaned against the staircase rail. "It's the first known Lunar-Earthen wedding in generations, the groom is a bioengineered wolf-human hybrid, and you invited the emperor of the Eastern Commonwealth and an ex-Lunar Queen. What did you expect?"

Scarlet glared at him. "I am marrying the man that I love, and I invited my friends to celebrate with us. I

expected a little bit of privacy.”

Wolf and Scarlet are getting MARRIED. I had no idea that they were getting married. THANK YOU Marissa Meyer for that pleasant surprise. Scarlet and Wolf are one of my favorite couples from this series and they are getting married. I’m still freaking out.

“Oh, Scarlet,” Cress sighed. “You’re getting married. It’s all like a dream.”
“I guess it sort of is,” Scarlet agreed, her cheeks flushing pink around her freckles.”

I missed them all so much. I love Thorne and Cress and Scarlet and Wolf and Cinder and Iko and Kai and Winter and Jacin. I’m in love with all of them.

“Hey, Cinder,” Thorne said, pacing to the opening that separated the entryway from a humble sitting room.
“Remember when we were here before? When we were just two crazy fugitives, on the run from the law?”

Yes Thorne, I do remember- don’t make me cry harder.

And the reunion between them all- ahhh I couldn’t handle it. I love Marissa Meyer for writing it so beautifully.

“I told them that was the dulcet roar of a Rampion’s engines,” said Kai, “but they all insisted it was just another media hover flying over.”
Cinder crossed her arms over her chest. “You’re an expert on the sound levels of spaceships now, are you?”
“Nah,” said Kai. “I’ve just been waiting to hear that sound all day.”
She smiled at him, feeling the hummingbird flutter of her own pulse. He smiled back.
“Aces,” said Thorne with a low groan. “They haven’t even kissed yet and they’re already making me nauseous.”

Oh, how I missed Thorne’s snarky remarks.

I can’t even begin to explain how happy **Something Old, Something New** made me, it was the most beautiful impromptu wedding ever created.

“Wolf took a step closer so that he towered over Scarlet, creating what could have been a moment of intimacy if the room hadn’t been so crowded. “So? Will you marry me?”
Scarlet started to smile.
“Wait. Before you answer that,” said Thorne, gesturing around the room, “you should know that the store where we got all this stuff doesn’t take returns.”
Casting her gaze skyward, Scarlet said, “Well, in that case. Yes. Yes, of course I will.”

Also, I finally found out the answer to my most pressing question in an interview The Guardian did with Marissa Meyer:

Are the characters of Thorne and Cress in any way inspired by Flynn and Rapunzel from the Disney movie Tangled?

Surprisingly, no! I had actually completed the first draft of Cress before Tangled came out, and I remember

going to see the movie in theaters and having a jaw-dropping moment and thinking: Hey, that's my cocky bandit thief! There are so many examples of similar things cropping up in the same time in our culture or media, and this was definitely one of them. It's so weird how that happens!

Rereading because a certain someone is making me feel all the feels!

6 Stars!! ★ ★ ★ ★ ★ ★

??*"And they all lived happily ever after"??*

The Epilogue.★ ★ ★ ★ ★

"... I think she was a little concerned that i never made very many friends. And now look. I have so many friends, i need a cargo ship to keep you all in." <-- AWWW!

It was everything and more!! It was the closure i didn't know i needed! I still find myself randomly hugging this book, or just reading the bits of it when I'm bored. I'm so glad we got this epilogue, i broke into tears many times, not the sad tears, not the angry tears, but happy tears! I didn't even know there was a such a thing. This series will always have a special place in my heart.

The Keeper. ★ ★ ★

I love little Scarlet, she is so brave! No wonder she despised her father in the 2nd book. There was this part when Scarlet mentioned having a crush on some guy in her class, i was like..

Glitches. (Get it?) ★ ★ ★

*"She raised her finger to the corner of her right eye, searching for wetness that wasn't there.
'Right. A glitch. Maybe that's all it is.'"*

I love this title. This one gave me the feels! I never really cared about Cinder as much as others but this made me want to go back and reread the first book with a new respect for her.

The Queen's Army. ★ ★ ★

*"Please," he said, wrapping his arms around his mother's waist. If he held on tight enough, they could never force him to let go. **He clamped his eyes shut as the first hot tears slipped out.** 'Please don't let them__'"*

Wolf, Wolf, my baby Wolf! This one was the hardest to read for me. I hate Levana is all i have to say!

Carswell's Guide to being Lucky. ★ ★ ★ ★ ★

"Carswell stifled a sigh. Maybe he could start an after-school Flirting 101 class. There were a lot of people in this school who could really use the help."

Carswell Thorne, at the age of 12, is a flirt and a con artist. He uses his charms to steal smarter kids' math homework. I can't with him, where i was devastated for other kids, he made me laugh! Please don't hate me, but i ship him with Kate so hard! In my head she is still Cress, just with brown eyes.

After Sunshine Passes By. ★ ★ ★ ★

*"She would sing for a while before she began her work. Singing always made her feel better.
Sweet Crescent moon, up i the sky...,
That was all she could get through before the tears came in earnest, drowning out everything else."*

Ohh little Cress! This was heartbreaking! Especially reading this right after Thorne's. Little Cress wants Syblil to be proud of her and she would do anything to make her happy. This is just too much.

The princess and the Guard. ★ ★ ★ ★

"She didn't even consider using her glamour to hide the three gashes and the blood that dripped down her neck, staining her dress. She was proud. Her wound was proof that she had been to battle and survived."

This one is a must read! Back when Jain wasn't so cold, and Winter wasn't crazy, they were just two kids, and they were fucking adorable! I teared up multiple times while reading this. This explains so much, how she went crazy, why she decided not to use her gift, how she got her scars, and her hallucinations. Their friendship/love is legendary! I love them so freaking much.

The Little Android. ★ ★ ★

Okay, WHAT. THE. FUCK. DID. I. JUST. READ? How the hell these robots are developing human emotions? It's creepy as hell. This was so sad... i cried her her? It? What was that? I do not know but what i do know is, it was B E A U T I F U L.

The Mechanic. ★ ★ ★ ★ ★

"If i'm not back in an hour, then i've probably been cornered by paparazzi and screaming girs and you should send the royal security squad after me."

This was the one i wanted to read the most, and it did not disappoint me! If anything it was too short. I could read the whole book from Kai's POV. You know how Jain and Wolf are super intense, and Thorne is a

player.. Kai is just so nice without being boring, it's just so rare. I love him! I want more.

I AM CRY SO CRY I LOVE THESE CHARACTERS.

I could easily give this a 5 stars based on the last novella alone but the majority were 3 or 4 stars so I gotta give the overall collection a 4 star, BUT THAT LAST NOVELLA OH MY HEART.

My favorites of this collection were The Princess and The Guard, The Little Android, and Something Old, Something New (OBVIOUSLY)

It was really fun visiting these characters again and also getting some back story on all of them! Overall fantastic read.

This was really fun! I loved going into the past and of course the future for some of my favourite characters. The short story format was really fun, there were some I enjoyed more than others but as an average they were 4/5 stars!
