## **Stellar Collision** Sadie Grubor

Christopher Mason got more than he dared to believe he deserved; the perfect woman, a love deeper than the emotional scars he carries, and a family. But in true Chris fashion, the greedy asshole wants more. He won't settle for anything less than a legally binding, last name changing event. One that can't take place soon enough.

What he isn't ready for is a discovery that will take him back to a dark place, one he refuses to repeat, but sometimes we find our largest revelations hiding in our darkest fears.

Mia and Hush are at the top of their game in the rock world. Deemed the current Queen of Rock, Mia is feeling the pressure as well as the love from the industry. She's also not happy with the lengths Chris has gone to for their wedding, but her love for the big asshole, and his unwavering devotion to her, is greater than her frustration.

Then a realization puts the two of them on opposite sides and Mia fears this is the one thing their love won't be able to overcome. For the first time, Mia's own fears and emotional turmoil might outweigh Christopher.

You're cordially invited as Christopher lays his final claim.

### Dayreader Reviews says

It's no secret that I love reading Sadie Gruber. I fell in love with the characters of Chris Mason and Mia Ryder in Falling Stars. Their story was the second "rock star" series that I'd read and it cemented my love for this genre. Chris has always been the bad boy rock star hiding his pain from the world through his wild acts and pushing everyone away - until Mia. This is the third chapter in their love story - and they are finally getting married!

This time, it's Mia who is unsure. She's the one who is the big rock star now and all of her insecurities are front and center. I can't tell you how long I've waited to read this book and Sadie did not disappoint.

This is a novella but the length did not diminish the importance. This was the perfect way to tell their story. Chris and Mia are one of my all time favorite couples - so much so that I've read their ENTIRE story - from Falling Stars book 1, Stellar Evolution 1.5, and now Stellar Collision 2.5 - at least three times! I also put this book as one of my Top 2015 reads. Chris Mason is back and he's making sure that Mia will never leave him - 5 Stars!

I received this book as part of the review team at Bookhore Addits.

This book shows the all encompassing power of love. It shows how hard it is for a loved one to deal with seeing you in pain and being rushed away from them and it shows that pain when a second joyous occasion brings the memories to the front.

It also shows that love wins. It shows how no matter the fight that if the light shines through love always wins.

I have followed and fell in love with the forgotten and hush crew and need more. I need to know that Laney, Kat, Una, Jimmy, Dr J, Kel all find that one person to knock them off their feet.

I truly fell in love with Sadie's writing when I read Vegas Follows you Home and then Falling Stars with Christopher and Mia and the gang . I then read HITS and that book blew my book mind, Sadie has a way of making you feel like your in the book with these incredible Characters. So as I read my ARC of Stellar Collision I'm now madly and hopelessly in love with #ChristopherMason and all the characters from The Forgotten and Hushed Mentality! I will tell you this You are Cordially Invited To The Most Beautiful Wedding Ever. To me I've never ever read a Character like Christopher he loves Mia so very much she's his everything ❤? " For Fucking Eternity" Sadie thank you so much for writing this book I'm in total Awe with your talent and how you can rap me up in your book world and I never want to leave! #Perfect

### **Marie says**

This story is about Chris and Mia's Rockstar wedding. It has been so amazing seeing them now and the beautiful family they created. There are a few very Emotional bumps in the road to their wedding but nothing can stop a love like the love Chris and Mia has. Chris has come very far since book 1 but, Chris is still Chris (dark & wounded from his past ) Mia is still his Angel. She has made him such a better man. 1 quote from this book that Swallowed Me up was : Chris ... " I'll NEVER give her up,,I would sell what's left of my Soul to Keep Her." Their love is so beautiful, I could not stop Crying. I don't want to give to much away but I fell in love with them all over again. Then there is the Band Members. OMG How I loveeee them. They are so wild and funny and you just NEVER know what they are going to do next. There is also a Wild Bachelorette Party. Lots of Hot Sex, So many funny parts that I was crying and laughing at the same time. This is my all time favorite Rock Star Series and it just keeps getting Better and Better. This is a Must read 100 %

I just love this series ? and I'm so very happy Sadie Grubor continued writing about The Forgotten and Hushed Mentality and with Stellar Collision she made me fall in love with Christopher and Mia all over again.

Though it's 2 ½ years ago that I have read the book Falling Stars (for the first time) I was suck right back in from page one. It's her writing style that makes me feel like I'm in the same room with the characters, watching the banter between Chris and Jackson and feelings this special connection and love Chris and Mia share.

Both have been through a lot already and they so deserve to be happy and get their forever. But nothing is ever easy with these two...it's an emotional journey with many heartbreaking and heartwarming moments and I loved every word ?

Falling Stars was one of the first english ebooks I've read and maybe because of that I love him so much, flaws and all...he really has a special place in my heart ?

*I'll never give her up. Not without a fight. I'd sell what's left of my soul to keep her.*

*Not until death do us part. Because not even in death will my heart ever release you from our eternity.*

I already can't wait for the next book!

Firstly I had to wait a fucking age to read this but finally did!

When you have a series of books, usually the first is good the second is meh, the third tries to redeem itself for the second and then you have the novellas. Usually the novellas is a desperate attempt by the author to keep things going and milk you for your money, I can name a few authors who did this but as I'm in the festive mood I won't. Now Sadie Grubor has done the series ( she better not think she's done or we will have words!) and we have had two novellas for falling stars. Firstly they are NOT an attempt to milk you for your bucks they are just fucking brilliant! I am not a fan of novellas because but when it comes to this author she gives you want you need, not want. I could have read at least 30 more chapters and still be intrigued!

I absolutely loved it! Even though it was a novella I was still sitting at the edge of my seat. I am still madly in love with Christopher and his weird ass but what a fine ass it is. And love Mia too. I wish there was a full length novel for every single character in the book.

And even though I might have gotten a cheeky cameo, ( I'm famous bitches, please no flash photography!) I did love the book. It seems the author can't do wrong. And delivers every single time and never gives us false promises as fans. She's just brilliant! I would like to put on my favourite pjs climb into her head and just see what the hell is going on in there. I love her she's brilliant! No ifs, ands or but's about it. When it comes to her books I don't even need to read the sample I know it will be the shit!

Another Stellar novel Grubor! Well done!

4.5 Fantastic Stars!

Review by Lisa Kane

**"Without a reflection, the mirror is empty. Maybe it's hard for you to see, but, Christopher, there is no reflection in me without you."**

I have been in love with Christopher Mason and Mia Ryder since first reading Falling Stars. It seems like forever that I have been waiting for their wedding. They are engaged and it's finally time to get hitched. Along with their daughter Maggie, their band members and their family, they will be going to the private island Chris rented out for the wedding. Yep, you read that right-he just might have gone over the top in wanting to give Mia a dream wedding. Even if she is not an over the top kind of bride. But he did get her a sweet organized as hell wedding planner so she's learning to take it all in stride.

But this is Mia and Chris and drama is their middle name. So when Mia is hit with some life changing events Chris does not react well. He is finding himself back in that dark depressed hole that he once faced when he first met Mia. This man is so crazy about her that anything that could hurt her or take her away from him causes him to spiral out of control. Mia can't help but be hurt when Chris reacts badly to her fears and the two have a gap between them that just keeps getting wider.

But this is not the first obstacle these two have faced. If you've read the previous stories you know that their relationship has survived the most awful things life could throw their way. But they always survive.

Stellar Collision has just the right amount of steam and angst and drama and I loved it! I just hope with the future books planned in this series that I get to see lots of this couple!

**"Mia, I reach her in two long steps, "we are stronger than anything that ever comes our way. Will we argue? Of course, we will. You're marrying an asshole, for f\*#k's sake."**

With this ring ..... 4.5 stars

I've been looking forward to this book – The Forgotten and Hush are back and this time it is Mia and Chris's wedding. Sounds like it should be nice and simple but things usually aren't when it comes to these two!!

Christopher loves Mia with everything that he has but when some potentially life changing news comes their way, he reacts badly. Back in the darkness that he has been trying to escape, Chris focuses on the negative and what he sees as the real possibility of losing Mia. But what he doesn't realise is that his actions can do just that, Mia is hurt by his reaction and we are left wondering if they can mend the wedge that is growing between them.

It was so great to see the members of Hush & The Forgotten and there were moments of this book that had me laughing out loud on more than one occasions at the banter and actions of certain characters – Elliot for one !!

This book has just the right amount of angst and steaming hotness and was a fantastic addition to the series and I can't wait to read more.

Mia and Chris are finally going to make their wedding of their dreams come true. Chris still has some tendencies to fly off the handle but Mia always brings him back. Chris is faced with unexpected news and does not handle it well at all at first. Mia needs time to think after his reaction and Chris does not take the time apart well at all. Mia runs away for time to think but I really think their family and friends were way too much into their business. Gwen had no business walking in on Chris' therapy session with Dr. J and that bothered me. Mia and Chris did get the wedding of their dreams and an unexpected dream that came true for both of them. It did take Chris a while to get his head on straight but he finally realized what he really

wanted with Mia and went for it. Overall a good, quick read and a nice holiday surprise.

#### **5 Beautifully Electrified Guitars for Stellar Collision**

No words. The much awaited wedding. I just can't get find words for how perfectly Chris and Mia it all is. And of course, me being me, absolutely love the peeks at Jackson with his boys, and Liza totally becoming one of the girls. The only think missing was Sid, but there were plenty of mentions of her, and, of course, the next book is all hers. I had to reread Hidden in the Stars while I was on this highway, and I think I loved it even more this time around. Maybe this whole habit of mine of never intentionally rereading books needs to be reconsidered. Anyway, an absolute must read for fans of the series, but definitely not a stand alone. Also, though it kind of goes without saying, sexy times and filthy language make it not appropriate for the under 18 crowd.

Provided a copy of this book for an honest review.....

There isn't a story without drama for Chris and Mia. But this is one of Sadie's best books yet. It's centred around the stag do and hen night plus the wedding of Chris and Mia. Of course, both bands play a big part in the storyline with Elliott and Kat's one liners keeping you extremely amused, Jackson with his calming nature and overall a supporting cast to ensure the wedding goes without a hitch. No spoilers but you will be kept entertained throughout the book! Light hearted, steady paced book with emotional moments - loved it! Well done!

#### **5 STARS!!!**

This is one of my favorite series that I can just NEVER get enough of!! It's one of the rare series that the characters feel like my friends and family. That I connected with each and every one of them. I get to see how all of their lives are turning out.

Since I loved this series so much I was ESTACTIC when I found out about this one being released. It was so great to be introduced to new characters in HITS and spend more time with Jackson, but when I read this I forgot how much I loved Chris and Mia. I fell in love with both of them again. Individually as well as together as a couple.

In this book the whole gang are once again together to celebrate Chris and Mia's wedding. Of course like any wedding there's bound to be complications. Some were to be expected while some threw me through a loop. Everyone didn't disappoint making me laugh out loud. This series kind of makes it hard not to do that constantly. Like almost snorting you're laughing so hard. I loved seeing more of Chris and Mia's little girl. I've always loved reading books with kids in them, and Sadie does a great job incorporating that into most of

her stories. When I finally got to the actual wedding part it felt like it was a long time coming with Chris and Mia. I'll admit that I got a little teary during the whole thing. Especially when they recited their own vows. It was breathtakingly beautiful.

I'm VERY excited to read Sid's book and I'm hoping Sadie won't end with her. I'm hoping she'll be like the Energizer bunny with this series and keep going and going...

This was told in first person through the hero and heroine's POV.
