Only 3 chapter have been written so far, but I could not stand Roxie! She has someone breaking into her shop, destroying shit, and she refuses to except help from someone who could protect her. Seems kinda stupid to me. Maybe there's a legit reason for it, but, considering no new chapters have been written in a while, I'm gonna have to assume she's just a shrew.

Currently only Chapters 1-3 are available on her website..but they are hot, snarky, intriguing, funny with a dash of sweetness I was not expecting. NL is a fantastic writer who captures my attention quickly with each of the books that I have read from her in the Storm MC series. This is only a partial book, but I hope that she released more of it (or all of it) soon! One because I can't wait to read more about Storm and their friends,

but two because Roxie is in several of the Storm MC books and I have always enjoyed her sass, spark of life and her ability to be a kick butt friend!

I also wonder if this is a new spin off in the works because Liam is definitely an alpha, but he is not a biker. So far I sense he is the strong (bossy) but caring type. He reminds me some what of the guys in the Kristen Ashley's Rock Chick series...like a mix of Vance, Mace and Lee. And really, anything that can remind me of Vance & Mace I know I am going to enjoy! As always, NL delivers well developed and lovable characters! I will update this post as she publishes more of the chapters or whole book!
