## **Deathscent** Robin Jarvis

Robin Jarvis's latest creation is a world set in an alternate past. This strangely familiar Britain consists of ninety-three individual 'blessed isles' floating in the deep darkness and the story begins in December in the Gloriana Kalendar, when Elizabeth Tudor has reigned for one hundred and seventy-eight years.

Into this world – a place with no animals and little technology – comes a stranger, Brindle. No one knows where he's from, or how he's arrived. But he brings strange implements and practices, and he's about to change things forever...

## **Deathscent Details**

# From Reader Review Deathscent for online ebook

## Ann says

Nieuwe schrijver ontdekt, ik ben verkocht.

---

## Kirsty says

although this was published in 2001, there's no information on Jarvis's website about the other two books in the trilogy. this is disappointing, as I enjoyed this and would like to read more. stop writing about mice and finish this trilogy!

---

## Tim Lucas says

My favourite Robin Jarvis book so far (having read the Deptford Mice trilogy and the Whitby Trilogy). It is set in an extremely interesting world and has some of Jarvis' most loveable characters.

---

## Edward Davies says

I read this when it first came out and looked forward to reading the sequels, but Robin Jarvis mysteriously disappeared from the book writing world, leaving this and the Hagwood series incomplete. Since then he has started to finish off Hagwood, but there is no news on this. I enjoyed this alternate history story and found it slightly reminiscent of Arthur C Clarke's Childhood's End. A nice start to a series that may never be.

---

## S.Speakman says

A long, long time ago in a country far away, a young me found this whilst on holiday in his hotel room. I read it, I loved it. Having recently lent it to a friend who shared the same opinion as I, I've read it again as an adult and enjoyed it just as much.  
A great read.

---

## Octavia Hill says

I can never really describe how much I love this book, it's probably my favourite ever. I just found it gripping and fascinating and beautiful and yeah. Read it c:

---

## **Matthew Hodge says**

So here's something new ... Robin Jarvis has a crack at sci-fi in Deathscent.

I don't want to say too much about the story because not knowing where it is going is the best part about reading it. But what I will say is that Jarvis manages to combine Elizabethan England, sci-fi and steampunk into one detailed, spectacularly written piece of work. At all points, the story should have been a mess and yet it works perfectly.

The series title - of which this book sadly is the only one ever to have been published - is Intrigues of the Reflected Realm and *\*intriguing\** is the perfect word for it.

---

## **Heather says**

This is a childhood favourite of mine and it's been many a year since I first fell in love with this story.

Heart breaking, hilarious, clever, tense and intriguing - Deathscent has ever so much to offer. All these years later and I still can't accept what happened to Suet...

Robin Jarvis where are the other two books in this series! Shoddy. Eagerly awaiting them for a while now...!
