What did I think? Amber Frost by Suzi Davis has written a young adult magical romance like no other. For me the first little bit was slow and I wondered if I'd get in to it. But when Grace Lynn Stevenson meets Sebastian things begin to change. There is magic, chemistry, mystery and more. Lots of twists Suzi Davis does a great job of keeping you on your toes or reading.

Grace Lynn is in the art studio drawing these crazy images and wondering what is wrong with herself. Grace Lynn is quite the lead character. Teenager girl who seems to have everything anyone can want but is truly unhappy with life. She is rich , beautiful, has the popular boy and popular crowd. It is in the art room things change!

Sebastian is that bad boy good boy type of character. I say this because in appearance he is bad, he has tattoos and piercings , he isn't with the right crowd and her parents disapprove. Yet, he is oh so good because it is very apparent he is the right man for Grace Lynn almost instantly.

The bond these two share is sweet and sassy. It gives one hope as for what is to come and it also quite sad at moments. This relationship is not rushed it continues from the beginning to the ending of the book. Leaving you thinking what a refreshing and honest couple they are.

Grace Lynn's mom is just awful and you really find yourself hoping she gets some karma in the future. Walter well I'm not sure what his true story he is but he seems pretty awful too. Hopefully he will get some retribution for some of the evil he has dished out.

True Love Never Dies, Soul Mates, Magic this book leaves your heart aching for more. Thank you , Suzi Davis I can't wait to read the rest of the series.

I received a complimentary copy of Amber Frost for reviewing purposes. All opinions shared are my own!

Awes-mazing. This kind of mystical magic with an ethereal and esoteric atmosphere is exactly my kind of book. I admit that I just can't help myself. It's just such great fun to lose yourself in the pages of a good book. Cute mysterious guy, check. Cool MC, check. Magic, check. Intensity heightened by the agony of being a teenager, check. Danger, check. I'm sold. This book was so totally in harmony with my perpetual inner teenager that I am going to read the entire series. Suzie Davis is definitely on my "go to authors" list.

Jenny says

The story is about Grace who is from a well to do family. Her parents has high expectations of her, the most popular guy in school is her boyfriend and she strives to be the perfect daughter to parents that only care about appearances. But its all a façade as Grace is not happy with her life. Then one day she meets the very mysterious Sebastian Caldwell. Sebastian opens her eyes--she's happy with him and can finally break free of all the expectations from everyone around her. But Sebastian has troubles of his own too. His past is shrouded in mystery and he can't remember any of it.

I found both Grace and Sebastian more mature than your average teenager. For Sebastian its probably because he's lived for hundreds of years and have seen so much in his lifetime. Two other standout characters for me are Grace's mother and the butler Walter. Walter was creepy from the start and Grace's mother got more and more unpleasant towards Grace as the story progressed.

Also of note is that this is probably the first YA book that I've read that is set in a location that I'm familiar with. Its set in Victoria, BC and being from Vancouver I've visited Victoria a couple times. It's the first time where I've recognize/visited some of the more popular places mentioned in the story and I think that's so cool.

For the ending, we are left with an open ending with the possibility of more to come. Grace and Sebastian's story is not over yet so I'm intrigued with where the story will go.

Love love LOVE this book! I was not a fan of paranormal books until reading Amber Frost and now I think I might be hooked. Everyone needs to read this one, whether you like the genre or not. It is rated as young adult but I believe it will appeal to many age groups.

I didn't want Amber Frost to end...thankfully it is part of a series so the story will continue! I found myself putting off errands and chores so I could keep reading. After going to bed I would tell my husband that I couldn't sleep and then sneak off to read another chapter or two.

For a debut novel Suzi Davis has done an incredible job of character delvelopment and creating an interesting story line full of magic, young love, and mystery. I look forward to reading many more books written by this author.

Brandi Kosiner (Brandi Breathes Books) says

I am able to connect with main character before I even know her name! I can sympathize with the whirling thoughts and feeling like something is missing. As well as trying to live up to parent's expectations, which I am sure is a pretty universal thing.

And then I start to hate her a bit. The awesome looks, seemingly perfect boyfriend, artistic, family has money. But then I am snapped back to the fact that she feels empty, hollow- I have felt that before and no matter who you are or what you have, that is a horrible sensation.

The intrigue starts right away when her thoughts and drawing is interrupted by a mysterious guy she has

never noticed before but is supposedly in her class. He has an accent and he is beautiful so I am sold pretty much right away and want to find out more. Compared to him, when seemingly perfect boyfriend enters the picture I want to smack him J

Him and the other people of the popular crowd are stereotypical, but well written- jocks, superficial (at least at surface) girls. The way they are in the spotlight makes me really glad that I was never there even though I often wished I were popular in high school and still do sometimes.

Grace is obsessed with Sebastian- wanting to find out more. Actually looking forward to seeing him and finding herself smiling. I can totally see why. He says heartfelt things, and he also says strange things, that I want to know what is going on. There is obviously something paranormal with the forgotten pieces of his past and the strange events that happen. It is fun to watch unfold, and I was constantly looking for a free moment to read so that I could see what would take place next.

The romantic suspense and tension is well set up. She writes beautifully and there was one scene I (well, Grace, but you know what I mean) was expecting a kiss and didn't get it. I felt let down- that is a mark of good writing. Suzi's writing not only draws me in, it is lyrical. In this, some words and phrases are repeated close together, but it doesn't distract. My attention was drawn there, but it served to amplify what she was getting across. The plot moves wonderfully, showing me the action, the sweet moments, and the moments of processing.

I am so frustrated in Chapter 8 but once I finally understand it makes it all the more romantic and selfless. Yeah. I know. Vague and frustrating, but if you read, which I hope you do, you'll understand. I am a fan of how Grace questions things, not just blindly accepting and not caring. Though her decisions are driven by love, they are not solely based on it. She also holds to her morals and I like that she doesn't compromise based on how love and physical intimacy can make you push those lines so easily.

When the mystery slash paranormal aspect is revealed, I expected something of the like, but that did not lessen the impact or effect. I still had many questions about how it works. I can't say much else past this without giving spoilers, but it all leads up to an amazing conclusion. Pain love, past lives, danger, and sacrifice for those you love!

I really enjoyed this one, and definitely recommend for everyone to pick up a copy.

Awesome quote

"I had a strange dream last night... and I woke up thinking about you and I felt like I had to know you- like I was meant to." I blurted out. "That sounded weird." I added, dropping my gaze in embarrassment. He slid his chair closer to mine and leant towards me, gently reaching out over the empty seat between us and lifting my chin to raise my eyes to his. His fingers felt soft and smooth, and very warm.

"Don't be so afraid of the truth," he encouraged. His eyes were a dark black-blue now, twinkling mysteriously. "And just so you know – I like weird," he added with a playful grin, pulling his hand back to his desk before I had time to lean away.

I picked this book for the obvious reason, it had my name in the title. But seriously, this book was engrossing and I could barely put it down for a second! I stayed up much too late last night finishing it, even though I

was supposed to be writing. (Shh, don't tell my husband) If you haven't read it, do. You won't be disappointed! Can't wait for the sequel!

Ellen Ekstrom says

Thank you, Ms. Davis, for a story that kept me guessing and wanting more. My suppositions about Sebastian were so off the mark - thank you for not making it predictable. I enjoyed Gracelynn's transformation and can't wait to see what happens to her charming mother. I immediately thought of my favorite Disney villainess, Maleficent, when she appeared. The characters were developed and well-thought, though I had to laugh at Clarke - I knew so many of those in high school; nothing changes, does it? The prose was real and engaging, I was seeing everything in my mind's eye as vividly as if I was in Gracelynn's mansion bedroom or the shed near the park. The dialogue was great, though Sebastian sometimes creeped me out. If I was an 18 year old girl would I believe someone my age speaking like that? Ah, dear readers! You'll have to read this incredible book to find out all the secrets! I am eagerly awaiting Silver Dew.

Amber Frost - Suzi Davis Ebook. Dec 2010 Book Divas
Young Adult; Paranormal

5*****

What a great tale!! "Amber Frost" by Suzi Davis, published in Dec, 2010, is a young reader novel, though I as a rather 'mature' adult quite enjoyed this novel.

Very well written, "Amber Frost" is a tale of a complicated young love - with a fabulous paranormal twist. The characters are awesome and the story's continuous buildup came to a great end - while leaving room for book 2 - I hope. I for one will be watching for it!

I received this ebook for free to review from Book Divas. I am a member of Book Divas, Librarything, Goodreads, Black Velvet Seductions and the Penguin book club.

4/4.5 stars Upon starting Amber Frost, I was thinking that it was beginning to be a little predictable. Wrong. The storyline is fresh and new to me and It was refreshing to read a book with a different sense of paranormal if you will.

Grace Lynn Stevenson has recently moved with her wealthy and busy parents to Victoria. Her father has been promoted to a partner at a law firm and with that status comes money and greed. She was enrolled into the prestigious Craigflower Academy.

Grace is a standout. She is beautiful, rich, smart and is dating the most popular guy in school. But she isn't satisfied with her life. She is feeling empty inside. She knows she has the "picture perfect" life, but it wasn't making her really happy. She basically is a little show doll on the arm of her boyfriend and her parents (especially her mom) who basically rules her life. She even has her meals altered by her mother so she doesn't gain weight! The perfect manicured girl...so we think.

All of the sudden she really starts to notice Sebastian Matthias Caldwold. Known as a freak, geek and shadow boy. She is drawn to him and his tattoos but she doesn't know why.

Sebastian is used to getting what he wants. All he has to do is think about it. As soon as he sets eyes on Grace he feels drawn to her too. He's trying to remember his past and his dreams and nightmares become more vivid when he is around Grace more. Grace thinks he can be quite erratic and unpredictable; it was both irritating and intriguing to her.

Throughout the story, Grace learns what makes her truly happy but it is a journey long and hard. You will fall for Sebastian and the deep love that he and Grace discover.

There were moments in the book that made me think of Twilight and Dirty Dancing for some reason. It is somewhat predictable at the beginning but it delivers so much more! I really enjoyed this book and I hope there is a next sooner rather than later.

Well, there goes another one! A great YA book for anyone who wants a breather and something original to read.

Gracelynn Stevenson is a girl that has everything she could want in her life. Or so she thinks, until she meets Sebastian Caldwold, a student at her school that she somehow never saw before. Sebastian is a "punk", a rebel, with weird hairstyle, clothes and accessories, but with even weirder manners, background and secrets. Soon, Grace will find herself unable to keep away from him, and she will realize the life she's leading is not what she TRULY wishes for. Being by Sebastian's side, she is finally able to find her true self, to follow her own will and choices. But Sebastian's dark past is not something to be counted out. And with his unusual ability to always have his desires fulfilled, the danger she is in just because of her feelings for him is even greater than the mere disapproval of her parents towards this relationship...

Amber Frost was a very good book, and it promises to tell a very unique story. Sure, the concept of a love relationship that no one approves of is common, and so is the idea of soul mates and the whole thing with immortality. But the reader cares little of it once they get wrapped up in Grace's attempt to finally act the way she wants, to voice her true thoughts and feelings. Sebastian is a punk with a heart of gold (and let's face it, punks with tats and spiky hair have always been a girl's dream guy at least once in her life), and his witty remarks and comments, so in contrast with his philosophies, or the ancient wisdom that sometimes takes over him, is quite interesting. Sure, there were times where the story was awfully close to a typical love, angst story, what with all the emotional turmoil they both have to go through, but I think the final chapters all make up for it. Especially the cliffhanger ending - I seriously can't decide whether I love or hate those... Sebastian's ability to make everything he wants happen is different than any other kind of magic I've witnessed in such books, and yes, I find it extremely unique. Spells, being the chosen hero, or controlling elements or whatever? Pst, please, those don't even count when it comes to him. I mean, seriously, the guy practically gets

what he wants,that's his power!As simple and plain as it may sound at first,it's really something no other author has thought to do before,and for that I praise Suzi Davis.I really hope there is a second book(which I'm sure there will be!),to see how far Grace and Sebastian can go,now that they're back together and their Binding makes their magic to get what they want more powerful!

P.S.:And yes,I knew there was something fishy with Walter!I mean,what kind of butler would act this way?!

Sandra Pulliam says

Sigh!!!! This is going to be hard for me! Just to start I want to state I won this book. I have a hard time giving a rough review to someone who was generous enough to give me the book for free. That being said I feel the author would want me to be honest, so here goes.

I did not really like this book:(It took me so long to finish it because it was excessive in everything. From it's description of Grace's beauty to the dew on the grass. I kept falling asleep while reading it. I even wanted to just stop reading and move on to another book. I think this book hits every pet peeve I have with books. First and probably the biggest issue was how she shoved Graces looks down our throats. I got it the first 10 times it was stated. She is pretty we got it! Also, there was just nothing but over excessive descriptions of how much Sebastian and Grace loved each other. I got that also like the first 20 times. I actually went back through the book to highlight how many times things were repeated and pounded into my head.

Now, there were some parts that were good! Hence the 3 star rating instead of 2 stars. The ending was probably the only part where I was actually glued to the book. There was action, answers, and a sense of holding my breath to see what was going to happen next. The ending was really GOOD! It is the rest of the book that killed me.

So to wrap this up. If you can muster through the first 3/4 of the book I think you will enjoy the ending. I do want to see what happens with Sebastian and Grace. Creepy Walter gets two thumbs up from me also. But I may just read the spoilers because I'm not sure I can read another word on Graces beauty:(

Sarah says

I am always admiring and envious of those who are able to write a story containing so many intriguing, congruent details that I wonder how one ever came up with it, nevertheless kept track of it all. I felt the same way with this book, especially as the true beginning is yet untold (which we don't find out until the end), however, all the particulars fall into place perfectly as if the story was already fully written and clear and we are simply missing a huge part of it.

I loved the concept and well thought out design of this book. I can see how this first time author wanted to create love and passion and beauty with beautiful words and descriptions. My only contention would be that perhaps these descriptions were sometimes over used; creating repetitiveness that left me glossing over some sentences to get to the point. I would have enjoyed seeing such descriptions within the characters thoughts and actions themselves, hopefully leading me to my own parallel conclusions.

I judge a lot of books on their ability to hold me and this one certainly did. Once I got started, I always found

it hard to drag myself away from the computer to carry on with my life. Looking back at myself as a teenager, I would have eaten this book up in one day. I reveled in the romantic, oxytocin-producing tale this book tells much the same way as I did for the Twilight series.

I look forward to seeing the growth and depth that will surely be produced in Suzi Davis' next novel.

Molly Ringle says

Thank goodness: a YA paranormal set in the charismatic Pacific Northwest that DOESN'T have vampires or werewolves in it! I was drawn right into this book, and especially had an iron grip on my e-reader during the last few chapters (you know, the part where you're going, "No! You have to get back together! Come on!!"). At the start, okay, sure, I had a glimmer of skepticism about how Grace, our main character, could be so down on her life when by her own description she's beautiful, smart, rich, and popular. But a quick visit to the lunch table of her so-called friends verified that, yep, those people are vapid and depressing; and her home life is no better--perhaps worse. So enter hot, philosophical Sebastian with his tattoos and earrings (along with the private-school uniform), and I got right on board with that attraction.

Suzi Davis created a very cool paranormal idea in this one. It's nothing as obvious and overdone as the aforementioned vampires. In fact, we're not sure what the magical element is all about, or where it comes from, until nearly the end--but we're given clues and tidbits as the characters themselves remember them. (Not remembering their pasts is part of the mystery.) And, most delightful and romantic of all, we get to see the almost-random magic take place from time to time, in the form of leaves swirling around in a contained tornado while our main couple walks through the park, or an important amber pendant that fluctuates temperature in strange and significant ways.

And sure, given that they're at least eighteen and perhaps far older in the "soul" sense, the Twilight-level chastity seemed a tad unnecessary for a modern couple. But the physical chemistry was still certainly there, and thank goodness they were both warm-blooded humans, neither of them giving the other the impression of making out with a block of cold granite. (Really, Bella, that's sexy to you?) Guess you can always leave some things to the fanfic writers, in any case. I'm tempted to write that scene for Sebastian and Grace myself. (*saucy wink*)

I'm definitely going to be looking forward to the sequel coming out soon!

Darlene says

Wow! It is not often that a book causes me to laugh out loud and later weep until I can't see the words. OMG! Where is book two?

It is set in Vancouver, BC. That is part of its charm. But it begins with a young lady that you probably won't like. A richy B****. You'll wonder why you keep reading. What slowly dawns on you is that girl is only responding as she was taught, as had been impressed on her since birth: Be a good girl, do as you're told, stay a quiet mute. Hmmm, where have we females heard that before.

Just as you give her the grace to be herself, Grace begins to see the magic leading her to be herself. Okay, this doesn't sound as exciting as the book is, but I don't want to give anything away. I refer you back to my first paragraph. I couldn't stop reading, especially after the magic begins to turn her world right side up.

If any of my friends would like they can download the book on the author's GoodReads page. Suzi Davis is her name. If you don't get to and are struggling to find the pennies, I bought the Kindle version so that I can loan it. I hope you will love Amber Frost as much as I did.
