I haven't actually read the book version of Homestuck, but I have caught up with the original version: the webcomic. Amazing, that's really all I have to say. My words couldn't describe the power of Homestuck.

For those who care to know... yes i am reading the actual web comic. Online. And i am continuing it because it is that awesome! It ruined my life in the best way :o)

And word of advice. Read more than act 1. It get soooo good at around act 2 or 3. And it will be VERY confusing starting it but you'll get used to the lingo and what things are. And intermission of act 3 was boring as heck but it played a big role in act 4. So things that don't make sense will later on!

Anyways trust me. It has tons of hype for a reason. The characters are wonderful and the plot gets more complicated.

I highly recommend this comic. It will give you the feels and make you laugh and it's worth it to see the trolls and the humans and all the other characters. It's also one of the most unique things i have yet read. It is awesome and lovable. You won't regret it. :)

homestuck is a webcomic and best read that way, since it includes animation, music, and even interactive games, but it is also highly complex, so it is worth a reread in book format, particularly as the author has a note at the bottom of every page, much like a director's commentary on a dvd. homestuck is about gaming and time travel and programming and coming of age, aliens, alternate universes and cultures, etc. it's hilarious and sweet and seriously, the author is a genius. a genius unafraid to revel in lowbrow adolescent depths.

woah, that took like 4 months

This is getting more and more interesting. Also quirky. :D
