Swati says

Another story which uses the medium that it is being told in - beautifully. It is always fun to see a comic book do a style of narrative that can be executed so perfectly in graphics. An intriguing story or stories.. :) . This takes a break from the continuity.

Amber says

Best issue yet

Tony Stark says

No dialogue and this STILL managed to nearly give me an anxiety attack. Jesus fucking Christ

Anna Heidick says

Great issue! I thought I might stop reading the series but this issue was thankfully well done. It's a good road not taken style of the viewing of choice. One direction. Left, right or center is all it takes to change your destiny in the multiverse. It's also a silent comic. Letting what's shown in the art speak for itself.

Keri B. says

This issue is an example of why I love this series.

1. Absolute twisted sense of horror and the absurd.
2. Innovative story telling, in that there were the three complete stories.
3. Fantastic art with the whole Neapolitan color scheme.
4. Dark conclusion.

This series is like a kick in the chest with every issue and I can't get enough. I absolutely love this one.
