**Personal Disaster** Ainsley Booth

**She's looking for a story about a billionaire. He's the park ranger standing in her way.**

Ten years ago, Marcus Dane left the tech world in his dust and joined the National Park Service. For the last decade, the world has ignored the park ranger-who-could-have-been-a-billionaire, but now an intrepid reporter has tracked him down. Worse, Poppy Lisowski has a theory about him which could blow his quiet life to smithereens. He needs to send her packing. But he's already tumbled head-over-heels in insta-lust with her flippy ponytail and smart mouth...

## **Becky says**

Marcus and Poppy's story gets a serious expansion. We get a lot more of both of the characters and far further into their relationship, although Ainsley still manages to leave me wanting more!!!

Marcus is a secret billionaire, which Poppy finally discovers in the extended version. We also get more insight into what he's been doing while he's also been being a National Park Service Ranger. He's watching out for people, not just Brianne but also now Poppy. He keeps an eye on pockets of trouble. We still don't quite know why though. Marcus is a brilliant set of insights and puzzles all the way through, for the reader and for Poppy too.

It's more of the wonderful writing that I've come to expect from Ainsley Booth. She really makes the characters human and alive. Wonderful.

### **Personal Disaster...**

A delightful read. A great addition to the series. Secret billionaire is a park ranger and falls for a reporter. But the road to that love is filled with angst, drama and passionate twists and turns. A short story but still delightful.

I'm indifferent on this book. I feel like I missed some introductory material because I never really got the background on either character. The writing was totally fine, but neither the characters or the plot pulled me in. I thought the prior two books were really cute and fun, but this one was sort of meh for me. The title also doesn't make sense - neither main character was a disaster.

Goodreads says this book is 47 pages, which is wrong. Amazon says it is 152, which seems accurate.

### **A great fast read!**

I loved Marcus and Poppy's story. So much more to Marcus than I expected. My only complaint was that I didn't see a clear link between the title and the story.

**What a great romance! ???**

This book is so good! There are plenty of twists and turns with lots of laughter and passion. It also shows that long distance with can work out if the emotions and time are out into them. ???

### **Fun & Sassy**

Poppy is a spitfire reporter. Marcus is a private man she is after. He lets her into his world & she discovers he isn't who she was really after for her story. They clash & steam up the mountain side together. Their love story is fun and light.

Personal Disaster is the third book in Ainsley Booth's Billionaire Secrets series and is about Marcus Dane and Poppy Lisowski.

Marcus left the tech world to work an everyday job in the National Park Service years ago, but reporter Poppy has tracked him down trying to find out why a billionaire just disappears out of the limelight and chooses to work a normal job.

Not wanting anyone to find him or ruin his now quiet life he hopes he can get Poppy back on a plane and out of his life only he has fallen hard with an instant attraction for her and to be honest doesn't want her to go any where that is away from him.

I'm looking forward to reading more books by Ainsley Booth.

I enjoyed this for the most part but felt like I was missing a big chunk. Poppy is investigating a mysterious former software engineer. She hunts Marcus Dane down in Colorado and the reason for her investigation comes to light and I was so freakin' lost. I follow the news religiously, and consider myself up to date on current affairs, but had no idea what the heck was going on in this book.

Putting that aside, the story between Poppy and Marcus was tumultuous at first and then got interesting once they opened up to each other. A quick and fairly easy read.

I LOVE MARCUS.....that's it... I LOVE HIM!!!

It's just so sad that this series are short stories...I could read about these man all the fricking time!!!

---

**Katherine says**

The characters are developed, and beautiful in their complexity. There's no 2d characters here. The book is beautiful in its love of the story and the story flows so beautifully. I can't wait for the next boy to fall. Coz when these billionaires fall they fall hard.

**Darcie says****Perfectly sweet fun story**

I love Marcus and Poppy. They both stayed so true to who they are as an individual person and melded their lives together into one. This was the perfect holiday weekend read!

**Jennifer Lovins says****The reporter and the Ranger**

Sparks fly right from the start. Poppy and Marcus distrust each other, but still want to be around each other. Will there be a happy ending for them or will outside force destroy their chance?
