**Plants Have So Much to Give Us, All We Have to Do Is Ask: Anishinaabe Botanical Teachings** Mary Siisip Geniusz , Wendy Makoons Geniusz (Editor) , Annmarie Geniusz (Illustrations)

Mary Siisip Geniusz has spent more than thirty years working with, living with, and using the Anishinaabe teachings, recipes, and botanical information she shares in *Plants Have So Much to Give Us, All We Have to Do Is Ask*. Geniusz gained much of the knowledge she writes about from her years as an oshkaabewis, a traditionally trained apprentice, and as friend to the late Keewaydinoquay, an Anishinaabe medicine woman from the Leelanau Peninsula in Michigan and a scholar, teacher, and practitioner in the field of native ethnobotany. Keewaydinoquay published little in her lifetime, yet Geniusz has carried on her legacy by making this body of knowledge accessible to a broader audience.

Geniusz teaches the ways she was taught—through stories. Sharing the traditional stories she learned at Keewaydinoquay’s side as well as stories from other American Indian traditions and her own experiences, Geniusz brings the plants to life with narratives that explain their uses, meaning, and history. Stories such as “Naanabozho and the Squeaky-Voice Plant” place the plants in cultural context and illustrate the belief in plants as cognizant beings. Covering a wide range of plants, from conifers to cattails to medicinal uses of yarrow, mullein, and dandelion, she explains how we can work with those beings to create food, simple medicines, and practical botanical tools.

*Plants Have So Much to Give Us, All We Have to Do Is Ask* makes this botanical information useful to native and nonnative healers and educators and places it in the context of the Anishinaabe culture that developed the knowledge and practice.

## **Plants Have So Much to Give Us, All We Have to Do Is Ask: Anishinaabe Botanical Teachings Details**

Date : Published June 22nd 2015 by Univ Of Minnesota Press (first published May 1st 2015)

### **Carol Stanley-Snow says**

RECEIVED FREE THROUGH GOODREADS FIRST READS.

Wow! What a great reference book. And, the stories are wonderful. As an American Indian, i can certainly identify and appreciate the history.

Looking for this book? Look under NATIVE AMERICAN STUDIES/NATURE. You too will keep handy...

### **Rachael Button says**

I loved this book. I read Mary Siisip Geniusz's "Plants Have So Much to Give Us, All We Have to Do Is Ask: Anishinaabe Botanical Teachings" cover-to-cover in just a couple days then immediately re-read it. I expect it to be a reference that I keep on my bedside table or in my backpack for years to come. Highly recommend this book to anyone interested in plants, herbalism, ecology, or ethnobotany.

### **Ruby Sonnek says**

Best book about plants I've read, even including identification guides. Don't settle for something that just gives you a name and uses; this book has stories about plants and cares about them. It also includes some good moral values and you will probably find a lot of your beliefs about plants de-colonized as you read this book. Love the author, her voice, her humor, and her mentor Keewaydinoquay.
