## **Suzanne Wallis says**

This colorful tale invites us all — children AND adults— to step away from the responsibilities of daily routine and dance with abandon in the silver shadows of the moon. Like Hayden and his tower of blocks, we tap into our imagination to learn new skills. But there is so much more to discover when we let our imagination run free.

Just as Lightning McQueen learns the value of slowing down in Pixar's feature film CARS, Hayden experiences the joy of adventure as he dances through a summer garden in the light of a full moon.

This is a very cute book. Great for children. Has great pictures to create a visual and family bonding. Also teaches children that a bath is a good thing.

I won this book from good reads and have read it to my nephews. They really enjoyed it and want me to read it every time i see them. :)
