America is under attack. Its institutions and values are under daily assault. But the principal culprits are not foreign terrorists. They are influential and powerful Americans secretly stirring up disunion and disloyalty in the shifting shadows of the Democratic Party.

Radical infiltrators have been quietly transforming America's societal, cultural, and political institutions for more than a generation. Now, backed by George Soros, they are ready to make their move. These "progressive" extremists have gained control over a once-respectable but now desperate and dangerous political party. From their perches in the Democratic hierarchy, they seek to undermine the war on terror, destabilize the nation, and effect radical "regime change" in America.

With startling new evidence, *New York Times* best-selling authors David Horowitz and Richard Poe shine the light on the Shadow Party, exposing its methods, tactics, and ultimate agenda.

## **Elijah Christopher says**

There's always more than just one person that makes one's decisions in politics. I understood quite well what Horowitz was expressing about the Democrats, I'm not affiliated with either party, so it was easy for me too read this with an unbiased view. My point with that statement was to say it was well written. Aside from that, I personally believe we can get dirt on anyone or any aspect in politics, because everyone has their own view on how things ought to be done in America, or anywhere in the world for that matter. So no one person has an omnipotent view over anything involved in the lives of those in power. I understand that this is supposed to be a historic work, but even his sources had biases towards the Democrats. I'm not saying he's right or wrong, just that we can't take any writing such as this and see it as the full truth, or definite answer as to what happened in those times, because it is only the interpretation of, in this case, two authors and their sources. On that note, Soros was an interesting character, and I feel that his followers ought not to trust him, as he is similar to Howard Hughes. Hughes gained power quite quickly, then he went no where with it, and Soros seems to have done the same. "The Shadow Agenda", though I believe it exists, Horowitz seemed unable to say anything about its future. So we can worry about this of course, take it into account when we vote, but lets not all go into complete paranoia over it. We still have to live our lives and do our jobs. This is not to criticize Horowitz, he's an exceptional author. My point is that as long as we have good, hard working, and productive Americans, I think we can take what comes, whenever and whatever it is that may. I've preached this before, and I will continue to do so as a non affiliate, (though my views are leaned into Republican more than anything else, just to be honest about that statement), we need to stop seeing each other as Reds and Blues, and start thinking that we are Americans. Unity is what holds and has held this nation together for the past three hundred or so years, and that's what will continue to do so.

Everyone who cares at all about the the financing of political machines by those bent on controlling the pace of the move toward a global redistribution of wealth should read this book. It was published before the 2008 US elections, and the groups who have been exposed as major influences since then are included. David Horowitz and Richard Poe did a masterful job.

Published in 2006, this book might seem outdated, although much of its arguments can be applied to global politics today with interesting new insight.

With meticulous research, the book pulls all the strings together of the George Soros Open Society Network. It is a fascinating read for anyone interested and concerned about the future of the world and particular America in a changing landscape where the rules of warfare shifted mostly to the election booths, education, economy, and social institutions.

The book lays out the vast network of organizations and players forming George Soros' Shadow Party, a powerful party of rebels and rulers - a corporate unity of capital and labor, insinuating itself into the heart of the American system.

Political parties can be bought and elections disrupted by the leaders of a state within a state, or a party within a party, with nobody catching onto it.

I've been fascinated by David Horowitz because he WAS a sixties radical. He's well-read and articulate, and I actually planned to read his autobiography first, "Radical Son." But the name of this one caught my eye, and I'm glad I read it. It's an eye-opening book about the under currents of radicalism that are at work in the Democratic party. The book is rational, extremely well documented, and a fascinating look at someone who might possibly be even more pathologically narcissistic than Obama - George Soros. The co-author, Richard Poe, is a former radical as well. The material is laid out very factually, with practically no personal commentary. It reads like a documentary rather than an op-ed piece, and those who are familiar with the term "secret combinations" will want to take a look at this one.

This book should be required reading for anyone, especially college students, concerned about the fate of our country. Our freedom may depend upon it. This is no conspiracy theory. George Soros and the far left liberals, communists and socialists are working to destroy America. Today's Democratic Party is not the Democratic Party of our parents. My father, a life long Democrat, would not recognize today's Democratic Party.

Reinforced what I already knew of the Democratic Party. It has changed over the years and no longer are the "blue dog democrats" in office. It is represented by radicals that want to change the constitution and are not looking to support ALL of the people. Only the "group of the day". I found the book interesting, but slow to read at times. Gave it a 4 because this is a presidential election year and think it is a good read to be informed on the other side of politics.

Good info. Lots of connected dots that the liberal propaganda machine will never reveal and will do anything to hide. Writing style itself is just mediocre. Eye opener.

Man, did HE nail it. This was written before the rise of Barack Obama, but you now see so much of what Horowitz predicted has come true. It was meant as a warning of things to come. Now it reads like a history book.

3.5

This book contains information, quotes, and connections between George Soros, Hillary Clinton, Saul Alinsky, George Wiley, John Podesta, Cloward and Piven, Wade Rathke, ACORN, American Friends Service Committee, Center for Community Change, La Raza, National Welfare Rights Organization, SEIU, Tides Foundation, Shadow Conventions, MoveOn.org, Center for American Progress, America Votes, G.S.'s Open Society, and others.

The information and connections about and between these individuals and groups is very interesting. Much of their strategies are stated in their own words in books and recorded interviews (not with the authors).

The part I don't like is the tone which is echoed in the Goodreads review, "America is under attack. Its institutions and values are under daily assault. But the principal culprits are not foreign terrorists. They are influential and powerful Americans secretly stirring up disunion and disloyalty in the shifting shadows of the Democratic Party." Sounds like a sinister conspiracy theory. Maybe the authors do that to catch readers' interest and capitalize on fear, but it makes it easy to dismiss using Alinsky's Rules for Radicals.

I do think the book is worth reading as it holds information regarding the shift of the Democratic Party, strategies of powerful Democrats, and the influence of money as it relates to Democratic Party issues. It is unfortunate that the masses of people are willing to vote for the candidate that will promise them the most. The candidates are backed financially by powerful groups that they are beholden to--favors are returned with legislation and public (tax payer) money.

My own thoughts:

We need term limits to lessen the influence of special interests, but the Senators and Representatives will never pass that. We need to keep money and power away from the federal government and return it to the states and localities. We are going in the wrong direction. I hope people will read about the issues contained in this book and will fight for these things.

My dad asked me to read this book because I didn't seem to agree with him that Obama was a "wolf in sheep's clothing". The book seems rife with conspiracy theory; it talks about some "shadow party" that is

controlling the liberal establishment through what they depict as the liberal extremist George Soros. They create some loose connections between some extreme liberal activist in the 60s and 70s with Soros and his philanthropic organizations, and try to make the point that he is controlling the Democrat Party.

There are plenty of problems with the research done in the book. If you look up the quotes, there is a lot of mischaracterizations. This combined with the weak links make this for an awful batch of fear mongering and conspiracy theory.

Horowitz lays out with stunning accuracy the formation, intent, and plans of the shadow party *ibid*.

The coup explained is how the outside influencers orchestrated phony campaign finance reform to force the Democrats into their non identified, but politically aligned system under their command to control the party. The methodology exposed foretells the globalist infiltration happening still a decade later.

I picked this up at the library years ago and just reread it again as a start point on George Soros- for that it has served its purpose very well.

I was hoping for a well-executed, well-researched, balanced and pragmatic look at the facts and ideas. What I got was poorly-written, baseless propaganda. I have no particular love or favor for Hillary Clinton or George Soros, but even the way this is presented is sophomoric.

"Any journalist who has studied Soros with sufficient attentiveness has learned to greet his public utterances with an ounce of skepticism."

How wonderfully obtuse!

### **Mike (the Paladin) says**

This is "in it's way" an excellent book. There will be those who will, disagree with some of the conclusions drawn and the case that is made, only to be expected. But I'd say it's a book worth reading and considering. The book goes back a few years and things have grown in the direction looked for in the volume more than changed. it predates the present president so some of the players have shifted in importance a bit, but the "main" player the book is concerned about is still very much on the world's stage.

So, even if your immediate reaction is to avoid the book I suggest it. I've read Alinsky, even if I can't say i like his ideas much it's good to know what's trying to be accomplished...if you're big on Mr. Alinsky and Mr. Soros you stillmight want to look this over. Just a thought.

From laying out some background, examining actions, their consequences, and intents to considering what

may be the future possibilities and probabilities the facts in the book are to my knowledge accurate. There were a couple of places I disagreed somewhat with the implications and even situations in question (some of the peripheral ideas about the Nixon years, Vietnam and so on) I still find the book, overall very accurate and scary.

Should give you cause to think.

Albeit this is a dated book, since Hillary Clinton is in the title, it is the Rosetta Stone to those who wish to understand how the Democrat Party has been suborned to radicalism and just who is behind it all.

GEORGE SOROS.

Surprised? The Shadow Party chronicles his surreptitious funding through the auspices of the Open Society Initiative and other more covert entities of:

- 1.MoveOn.org(whose founder in 2004 famously proclaimed "we now own the Democratic Party"; and which issues marching orders to Senator Harry Reid and Speaker Nancy Pelosi in equally famous Monday night conference calls;
- 2.Media Matters,aimed at harassing right-wing radio commentators to impede their ability to get the truth into the common weal;
- 3.Association of Community Organizers to Reform Now- ACORN- whose state voter registration frauds are only now being exposed;
- 4.American Civil Liberties Union in its campaign to declare 399 cities free zones in which the rules of the PATRIOT Act do not apply and to impugn the intentions of the military in Islamofascist prisoner detention.

In detail, it exposes how the Democratic Party is invested in weakening our military in general and in Iraq and Afghanistan specifically by defunding it at the Congressional level at the same decrying it on the grass roots level under the mantra of "Bring our boys home". It worked to the national detriment in Vietnam, (where GEN Creighton Abrams never lost a battle after replacing GEN William Westmoreland in the wake of the Tet offensive. Our leaving allies to their fates resulted in the murder of over three MILLION Vietnamese and Cambodians by the triumphant Communists. This should happen in the Middle East according to the radicals plan to reduce the deterrent effect of a strong military.

Barack Hussein Obama, an unknowable pliant stalking horse of a candidate, is being funded by this man and is the beneficiary of a Soros bought and paid for national media. (As Andy Rooney says "Jever wonder" how the talking points and words are IDENTICAL across all the networks and large newspaper chains?

All the methods of this new Machiavel are on display in this book. Read it and get a new insight into just how the wreckage through which we now wade was caused.

Politically correct it ain't: therefore truth is reflected.

Highly read recommend this book. certainly tells a story about how we got here, politically. Worthy read and I could only wish it was a "story".
