**Witch Weed** Phyllis Reynolds Naylor

*"One of the most feared of a witch's powers is that of the evil eye..."*

After throwing Mrs. Tuggle's evil glass eye into the creek, Lynn and her best friend, Mouse, anticipate a soothing summer. But when Lynn notices some strange-looking purple plants growing down by the creek, she begins to worry. Is she imagining it, or are the plants sprouting right near where she threw the eye?

What's worse is that some girls from school may be starting their own coven of witches -- and Mouse might be getting sucked in!

Does Mrs. Tuggle have unfinished business with them? And if so, can Lynn fight her evil again?

# From Reader Review Witch Weed for online ebook

## Madeline Henricksen says

I made the mistake of reading this before falling asleep. . . .

Creepy book, but I like it because of the way the author describes the (marble as Stevie calls it)eye.

---

## Mandy Stigant says

This whole series scared the ever living snot out of me when I was 12. For kids' books, they're pretty damn scary.

---

## Keifer says

The book the witch weed is mainly about a teen girl named Lynn and her best friend Mouse had (in the last book) fought a evil witch named Mrs.Tuggle. So in this book Lynn had to go to a psychologist because her family thought that she was crazy. When she was at the psychologist she told him about Mrs.Tuggle and how Mrs.Tuggle's house burned down with her inside. But all of Mrs.Tuggle's evil came from her glass eye with some how has survived the wreckage. But this eye was found by Lynns' little brother and her brother starts turning evil and mouse throws the eye into the creek. Then everything wentry back to normal until theset strange weeds start sprouting by the exact spot that they threw the eye into the creek. What is thus mysterious weed that Mrs.Tuggles has planted read this great book to find out.

---

## F says

As a curious mom, this was my second book of the Naylor "Witches" series to read. I can definitely see why the series (because of their occult theme) has created some controversy among religious fundamentalists over the years. The concept of five 11-year-old girls forming a coven and making plans to perform a ceremony on a night of a witches' Sabbath to raise their newest member, Mouse, who is under their spell to a "higher" power so Mouse could get her mother to return home is a theme that a young adult reader might possibly have need to understand. The 11-year-old main character, Lynn, uses a can of gasoline and strikes a match to rid the area behind her house of the purple witch weed growing is a full-blown paranormal subplot.

---

## Canni says

Creepy, intense, exciting - All in all, very good!

---

## **Caroline says**

Lynn and Mouse destroyed Mrs. Tuggle, her house, and her eye, but now a mysterious purple plant known as Witch Weed is by the pond and strange things are happening as usual.

---

## **L.E. Fidler says**

Well, my suspicions about Lynn's mental health proved true.

WTF was this one about?

---

## **P.A. Pursley says**

Book five in the Witch's Sister saga! Almost done!

This book find Lynn and Marjorie, Mouse, finding out that their attempt to get rid of the dead witch's eye only made the evil spread. And there are others who want to be part of the witch's coven so the girls find themselves trying to battle not only the evil of the dead witch but her new converts, too.

If you enjoyed the first four of the Witch's Saga, you have to read this one!

---

## **Claire Caterer says**

Despite points here and there that feel dated now (corded telephones, for example), this 1991 novel still generates some genuinely creepy thrills. I remember being terrified by Witch's Sister as a kid (the first in this series), and never knew there were other books to follow. Any of them can be read as standalone tales, though. I sat up all night finishing it. :)
