## 101 Ways to Bug Your Parents Lee Wardlaw

Steve "Sneeze" Wyatt was born to invent things, and his latest gadget—the Nice Alarm, which wakes you up with a gentle tap on the shoulder—promises to make him rich and famous! All Sneeze needs to do is attend the Invention Convention, and he will be catapulted into stardom. So, when Sneeze's convention plans are nixed by his parents, who have enrolled him in a creative writing class instead, he is appalled. For his first writing project, Sneeze starts a list of ways to bug his parents. It keeps growing until he hits upon a brilliant plan—a plan that will enable him to attend the convention with or without his parents. . . . I thought that this was a very good book. It had a lot of humor in it so it kept me entertained throughout the whole book. The story wasn't complicated at all either so I understood everything perfectly. This book is about a boy who needs to go to summer school. And in summer school they are making a book, so he decides to make a book about how to bug your parents. The book was a big hit and he made a lot of money, but there were a lot of bumps along the way. Pretty much anyone will enjoy this book.

A story about a 6th grader who likes to invent things, this 4th grade reading level (at least 4th grade) was a delight to my 6 yr old who read it on his own. He loved the fun names, it was easy to read for him and engaging at the same time. He doesn't like all books and sometimes balks at length, so he almost didn't pick this one up. But I encouraged him to read just a few chapters and he was hooked. This isn't so with all books, so we'll definitely be looking up this author again!

Sneeze, is a boy who is very young boy who is "revolved" around himself. The book itself though is good because when I was younger, I would have considered myself a "rebel". This book honestly made me into more of a "bad" kid, because I would disobey my parents A LOT. The book itself, like the idea of it came from this one assignment Sneeze has to do, during his summer school.

If you would want to know what the book is mainly about, just read the back of the book to get a glimpse of it. Honestly in my opinion, this book is meant for 5th graders or 6th graders. I do enjoy the book because it gives me options on how to be a "bad" kid(I won't actually become one because I do not want to die lol).

8-year old really liked this. It's about a kid inventor who is trying to figure out a way to get to the Invention Convention when his parents say they don't have money to send him. I liked that the plot addressed real life issue of parents not having money to cater to kid's every whim; I didn't like some of the snarky attitude in the beginning, but he seems to round off as a character toward the end. Cute enough and kept our attention.

so so rich in only 200 pages. It was truly impressive how well this was written.

In the early pages, I disliked what appeared to be a snarky, obsessive, self-centered, & selfish young hero. And I would hate for this book to land in the hands of a child who already possesses those unfortunate characteristics. But, as the book progressed, his better character traits came to the fore.

Sneeze, our hero, is an inventor of more than a few failed inventions but he never gives up. His best friend, Hiccup, is his main supporter. Nicknames abound that the intended age group should find amusing. For months, Sneeze has been looking forward to a family vacation that would include a stop at the Invention Convention and the possibility of selling his latest invention. Epic fail. Finances are tight. The vacation gets cancelled. His parents need to work. They enroll him in a summer class with his least favorite teacher in lieu of a babysitter. Could life get any worse?

The book title comes from Sneeze's choice of topic in the summer creative writing class. He researches and tests these methods out on his parents for two obvious reasons. (Pity them!) 1- To vent his anger for canceling the vacation; and, 2- To sell the finished product to raise money to go to the convention on his own.

Okay, the kid definitely has an obnoxious side but as time and the book progress, he works hard, learns a few lessons and his better side emerges. His admirable perseverance sees him through trials and tribulations both at home, school, and work, with fellow classmates, the school system, parents, and a prickly co-worker. In the end, he acts both reasonably and honorably and becomes a hero in the true sense of the word. Not a bad finish.
