## I Love Mom Camilla De la Bédoyère

This adorable book looks at the bond between animal mothers and their offspring, from protective Mommy polar bears to playful orang-utans. Fascinating facts about parenthood in the animal kingdom will captivate young readers, for example did you know elephant calves are raised by their mothers and grandmothers? Cute photographs and easy-to-read text make this perfect for young readers. I Love Mom provides the perfect opportunity for parents and children to read together and explore the subject of human interaction, using loveable animals as examples.

I LOVE, LOVE, LOVE this! This is a great book to use for a storytime on Mother's Day or one on baby animals. The photos of the baby animals and their mums are adorable. I also love that for each pair there is a sweet saying, followed by actual facts about the animals being depicted. I predict that kids are going to love this book too.
