Midnight Shelby is starting over. She's leaving her ex-husband, the big city, and corporate life behind. She doesn't know where she's going until she happens upon an amazing website advertising real estate in Legend, Tennessee. The virtual tour of a large two-story big brick building on the main street makes her fall in love, with the building...and with the potential for a new life.

She has no idea she'll also fall in love with the realtor who sells her the property.

Martin McClain was born and raised in the Legend area. His family has lived there for generations, and he feels a duty to preserve it. Part of the reason is his thirteen-year-old son Daniel. The web site Daniel created has been good for business, but although Martin is a real estate agent by trade, he's wary of newcomers' motivations. With good reasons—one of them being Daniel's absent mother.

For love of Legend, and with an eye toward Daniel's future, Midnight and Martin begin to work together, and learn that in spite of their different starting points, their destination is the same: Home.

**Small town romance**

Midnight in Legend is small town romance at its finest. Martin and Midnight (I love that name!) set off sparks almost from their first meeting. Nice sweet story. Looking forward to reading more in this series.

**Beautiful Christmas Story**

This is a beautiful story of new beginnings that just happen to take place at Christmastime. A story of new beginnings for people and a town. Put a small town that needed help, a woman with a vision and, of course a man who didn't know he needed a happier life. I liked it so much that I've already purchased the next book to read tomorrow. Thank you Ms Scott! I look forward to reading the rest of the series.

**Thorny, sweet read...delightful!**

Take one heart-weary young career woman who needs to get away from her past, add one old-fashioned, single dad, toss in his thirteen year old computer whiz son, and mix well in a small town filled with promise. You have the makings of a Christmas romance. This book is such a sweet read, from the set-in-his-ways real estate agent who can not see progress as anything except a destructive move for his hometown to the smart executive New Yorker who puts the plan in action to save it. Of course they rub each other the wrong way every time they come in contact! Still, when they begin to listen to each other instead of misunderstanding everything, things happen.

This is definitely a good read. Ms Scott is a talented author with a plot that could be predicted, but is fun to read anyhow. Thanks for a good read!

#### **Really good story**

Really good story. I really enjoyed Midnight's 'go all out' attitude and her way of enticing the locals to see and accept her vision of Ledge. Martin came around a lot quicker than I thought he would and was more accepting of her relationship with Daniel than I thought was possible.

Midnight getting out of a marriage after 20 years, wouldn't take the advances of a co worker and ended up being fired. With a new jag, and a voodoo doll, in the front seat, she comes to her property in Legend. A town with buildings and people's heritage that go back for generations. Arts and crafts was what she wanted to sell here, the town was full of artists, but none willing to sign yet. Christmas Ball with the realtor, would people then recognize her as a valued member of this tiny, close knit community. The author was new for me, and I enjoyed it, it was fresh, dealing with second chances, big dreams, and a big desire to help the community. The plot flowed, and the descriptions were good. Enjoyable and easy to read, and hope to see more by her.

### **Melissa says**

I got the small town and all the trappings of said small town, I liked the hero, but I could not stand the heroine. Midnight Shelby was a spoiled, entitled brat of heroine; she acted more like 18 than a 42 year old

divorcee. She jumps to so many conclusions, opinions nobody asked for, and mood changes at the blink of an eye....and yet all her problems are of someone else's fault. The voodoo doll stuff just showed her to be a bitter pill to boot and wasn't funny in the least.

Martin was a decent hero, but really bland. I understood his motivations for wanting to bring in the right kind of economic resurgence into his small town. His family is a bit cloying, but the friends within the community seemed normal. I don't honestly see why Martin would want a relationship with Midnight and there wasn't any chemistry to warrant the relationship. I won't be reading anymore from this series or the author.
